Attempted Break In

Early Monday morning during the storm an attempt was made to break into Laut's store. They broke a window at the South side and tried to jimmy the door, when no doubt they were frightened away by John Chalmers, who has been acting as night watchman since the death of Mr. Nichol.

John had been over making his rounds by the Elevators and Service Station and when he returned to Main Street he picked up the fresh tracks of someone prowling around suspicious looking places. Following up these tracks he heard the noise of a car which no doubt was that of the marauders making their get away.

The necessity of a night watchman was again clearly demonstrated.

Local Board to Entertain Drumheller Board of Trade

The Local Board of Trade expect to have a large turn out to welcome the delegates from Drumheller on Wednesday evening next. The Banquet will commence at 7:00 o'clock sharp and will be held in the Masonic Hall.

President L. Roach of the Drumheller Board will be the guest speaker and a good musical programme will be arranged by the Entertainment Committee for the occasion.

Sid Jones Night Watchman

A special meeting of the Village Council was held on Tuesday afternoon for the purpose of appointing a night watchman.

After considering several applications, that of Sid Jones was accepted, and he will take over his duties immediately.

We Should Have Known Better

Last week a Calgary Daily reported that Herman Linder, of Cardston, had out ridden his fellow Albertan, Pete Knight, in the New York Rodeo. Thinking our readers would be interested we passed the information along. Now we find that Pete Knight was 31 points up on Herman for the weeks total and therefore won the Rodeo championship and another world's crown.

It just goes to prove how unreliable these large newspapers are.

Card Party Postponed

Owing to the condition of the roads, the Floral Local U. F. W. A. card party to have been held Wednesday night, has been postponed until Friday, November 8th.

C.W.L. Chicken Supper and Concert a Huge Success

The C.W.L. annual chicken supper and concert held last Thursday was a real success. One hundred and seventy-five sat down to a real supper which left nothing to be desired.

The three hour programme put on by the Calgary Entertainers and the Crossfield Players was enjoyed by a packed house.

Some of the local players were exceptionally good in their parts, while Bert Taylor as a comedian was the hit of the Calgary group. The children were all attention when the magician was performing and no doubt there is many a budding magician around town since then.

More than six inches of snow has fallen since Sunday morning, and it has remained cold and windy. Roads are badly drifted. The storm is general throughout Saskatchewan, Alberta and British Columbia.

With winter on in full blast, it will take a good chinook and several days of fine weather before threshing can be finished up. Probably five per cent of the threshing is still undone.

The Ladies Aid of the United Church are doing the catering for the Board of Trade banquet on Wednesday evening next and are putting on a hot chicken supper. The price per plate is 40c.

BORN—To Mr. and Mrs. Raymond Gilchrist, at the hospital Lethbridge, on October 29th, a son,

Funeral Services

R. L. Nichol

The funeral services of the late Russell Lindsay Nichol was held on Friday afternoon last from the Crossfield United Church.

The front of the Church was banked with floral tributes and the Church was filled with friends paying their last respects to a highly respected citizen.

Mrs. P. Fleming sang a specially requested solo entitled, "Shadows". The pall bearers were the members of the Village Council, on which Mr. Nichol served many years, W. J. Wood, W. E. Spivey and C. Assmusen, also J. M. Williams, T. M. Goldie R. M. McCool.

Tunis S. Ferguson

The funeral of the late Tunis S. Ferguson, held in Carstairs on Saturday last, was largely attended by friends from Cochrane, Calgary, Airdrie, Crossfield, Carstairs, and Acme, indicating the wide spread and high esteem in which the deceased was held.

The pall bearers were Messrs C. Boyce, J. B. Wylie, E. Richards, A. Gittos, E. Donald and H. Warner, all of them old timers and neighbors of the deceased.

The Sheidel Bros., also neighbors and close friends of the family, sang "Jesus is Calling".

Rev. E. Longmire conducted the services assisted by Rev. C. E. Rogers of Carstairs.

Besides a sorrowing wife he leaves to mourn his loss four daughters, Mrs. G. Fenton of Cochrane, Mrs. W. H. McCool of Crossfield, Mrs. H. G. Robinson and Gwen. of Carstairs, also four sons, Mac, Elmer, Charlie and Jack, all of Carstairs.

The funeral arrangements were in charge of M. Foster of Carstairs.

Ready Response To Appeal For Vegetables—Thank Donors

The goodwill offering, in connection with the Harvest Festival Services of the United Church, from members and friends of the Crossfield and Rodney congregations, has resulted in the collection and distribution of eighty-five sacks of potatoes and other vegetables. Seventy-five sacks have been distributed to thirty families West and South of Madden, whose gardens were destroyed by hail and frost, and ten sacks to the Woods Christian Home in Calgary.

Families receiving these vegetables and also Mrs. Wood desire to express their appreciation to all, who through their contributions to this good will offering, have expressed their kindly interest and neighborliness in such a practical way.

Rev. E. Longmire.

The March of Time

By Walt Thome

Walt Thome of Bottrel, a real old timer, was telling about the changing methods of 'buying' votes. This is the story he told his brother-in-law, Frank Winchell, an ardent Social Creditor.

"Many years ago they had the open system of voting and when a man bought your vote for five dollars, he could walk right up to the polling booth and see that he voted right.

Then they changed to secret ballots. A man could then sell his vote to all the candidates for \$1.00 each, and then he could vote how he damn pleased.

In the last Provincial election, Mr. Aberhart bought all your votes for \$25.00 a month and he bought them all on time. He also knew that he was protected by law and that you could not force collection."

Ralph McFadyen is in Calgary and is working out with the Junior Shamrock Hockey Team. Ralph gives promise of being an outstanding goalie, and although young in years he can kick 'em out with the best of them.

Big Ben McLeod, local hockey star is working out with the Calgary Rangers.

Looking Forward

Never in the history of the country have the actions and policies of an incoming government been subjected to such close scrutiny as will be the decisions and doings of the new Mackenzie King, Liberal regime, which was returned to power with such overwhelming support from all parts of the country on October 14.

The reason for this attention is not far to seek. Canada is apparently just emerging from a prolonged period of agricultural and world-rooted economic depression. During this period pocket books have been hard hit. Much misery has prevailed as the standard of living for a very large percentage of the population steadily declined. The cost of operation of all governments, federal, provincial and municipal has necessarily mounted to meet the demands for assistance from all classes of citizens, bringing in its train increased taxation at a time when people could ill afford it. Some of the expenditure has been met as it was incurred. Much of it has been pushed ahead for future liquidation.

As a result, all governmental units are faced with the difficult problem of operating economically so as not to bear down harder than necessary on individual resources and at the same time maintain a growing list of public services which the people have become accustomed to expect, and these conditions the governments are expected to cope with while an accumulation of indebtedness is being paid off. It looks like a herculean task.

The fact that such a large proportion of the population has felt in varying degrees the intensity of the depression years has in itself stimulated a much greater interest in the affairs of the country, the province and the municipality than the people evince in years of comparative plenty.

In good times the citizens are prone to take but a cursory interest in their own public affairs and usually only just about election time, but when times are hard and unfortunate conditions strike right into the home, people bestir themselves and become vociferous. And that is exactly what happened on October 14 and for many months prior to that date.

And now that the people have spoken their mind quite definitely it is safe to assume that, for a time at least, they will follow up their decision, by continuing to take a keen and watchful interest in what their representatives at Ottawa do. The interest so recently stimulated is not likely to be immediately extinguished now that the die is cast, and one of the reasons for this is the fact that even if the so-called prosperity corner has been turned, there is still a long climb ahead before the peak is reached.

For some time to come the upward struggle will be difficult. The road will be rocky in places and thorned bushes line the path. The inevitable temporary setbacks will be experienced and doubtless there will be some who will become impatient.

Whatever measures the new federal government may have in mind to smooth the highway and make the journey easier must await the necessary preliminary discussions and decisions and subsequent announcements and they must be put into operation before a final verdict as to their effectiveness can be pronounced.

It must be borne in mind that it took several years after the big avalanche of the fall of 1929 before the floor of the depression valley was reached. It is only reasonable to suppose that it will take as long, perhaps longer, to reach the summit as it required to touch bottom. Past experience has taught this lesson for those whose memories are long enough.

Canada, however, has come through this trying period in better condition than many other less fortunate nations. She has preserved her democratic institutions. The fortitude and courage of her people have proved a bulwark during the difficult period. Her financial integrity and credit have been preserved unimpaired. Her people have not starved nor frozen. Materially, she has not sustained such severe shocks as have been the lot of citizens of many of the other countries of the world.

With these assets to sustain the people in their progress towards recovery, plus such assistance as a stable government is able to give within its limitations, Canadians have every reason to look forward with hope towards the future.

And stable government, too, will be able to play an important role in the forward move to better things and improved conditions. It is true there are many who are disappointed that the political party of their choice was not successful at the polls on October 14, but even they will join the majority in expressing approval that the winning party was returned to office in sufficient strength to ensure a government that will be unhampered by the necessity of temporizing at a time when stability and a straightforward course is essential if a maximum of progress is to be enjoyed.

Even so, all eyes will be turned on Ottawa during the next few months.

Winter Food For Bees

To pack bees away for winter without an adequate food supply is to court disaster. It is far better says the Dominion Apiarist, to find living colonies with a surplus of food in the spring, than to discover them dead or depleted through starvation.

A ram was sold recently in Sydney, Australia, for the world-record price of \$2,595.

England is going back to the land under scientific protection.

Spain lists its population from the United States at 1,012.

Making Home In Surrey

The Duke of Gloucester and his bride-to-be, Lady Alice Scott, will make their first home at Camberley, Surrey, 35 miles from London. The Duke is a major in the Hussars and was nominated to the Staff College at Camberley by the War Office recently. It is expected the Duke will join the college next January.

Although a sea lion can consistently eat 20 pounds of fish a day, it can also endure long fasts, living entirely on its reserve fat.

Lincoln, England, has just opened its 1,000th municipal house.

Fifty-Foot Yacht Makes Safe Voyage Across The Pacific

Three months out from Yokohama, with auxiliary engines disabled three days after departure, the 50-foot schooner-rigged yacht *Romance* arrived at Victoria after weathering almost continuous hard gales across the Pacific.

The yacht was skippered by Captain Ernest Green, former master of the Canadian Pacific liner *Empress of Asia*, and carried a crew of two, the skipper's 18-year-old son Philip, an engineer, and John Hunter, former Victorian, able seaman.

"I've spent 40 years at sea, part of that time on old square-riggers, but these waves seemed like huge mountains with the snow coming off," said Captain Green, telling of the worst blow on Sept. 21.

"The *Romance* rode them beam on with bare poles, taking them in beautiful fashion and shipping no water. But when I saw one comber coming that must have been 50 feet high, I truly thought we were done for and uttered a prayer. But we made it. Then we put on two oil bags, one at the fore rigging and the other at the main. And the effect was instantaneous; the seas calmed and we breathed easier."

"The *Romance* is as safe as an *Empress*, though it may not be as comfortable. The French government thinks so well of it that French officials in Indo-China asked the builders for specifications. With more power this type of craft would be ideal for service in those waters."

Captain Green chose the old-time sailing ship track over 40 north latitude and sighted only one craft, a Japanese vessel, on the trip from the Yokohama breakwater.

The voyage was the culmination of a lifetime ambition of a seadog who retired last year and who made the crossing many times as master of the 17,000-ton *Empress of Asia* until he reached the retirement age.

Diamond Mines In Canada

American Geologist Believes There Is Hidden Wealth In This Country

A geologist and an industrial diamond expert voiced the belief that beneath the soil of Canada lie diamond fields far richer than those of South Africa.

Professor A. S. Furcor, of Western Reserve University, and Dr. W. Carter, head of a diamond tool company, agreed that authenticated diamond discoveries in the United States support the Canadian theory.

"They said the glaciers of thousands of years ago carried to this country many precious stones together with millions of tons of Canadian rocks and minerals."

Carter asserted he subscribes to a theory that northern Canada was a jungle before nature began forming gems in South Africa. "Therefore," he added, "Canada would contain far greater deposits of riches than the comparatively new dark continent."

POULTRY RAISER CONQUERS "ROUP"

Praises Minard's Liniment As Remedy For Roup or Bronchial Flu

Read in this letter from G. Minard, Fort Garry, how he checked Roup (Bronchial Flu) when it broke out among his young hens. "After trying other remedies and doing so with little success," writes Mr. Minard, "I tried Minard's Liniment. It was to his drugs on the tongue and some times more, depending on the birds. I am positive that it helped me out. Minard's Liniment is a tried and proven remedy for Roup, Bronchial Flu, and some diseases, as well as for Bronchial and Rheumatic trouble. For sale by all druggists."

Population Of World

Estimated It Will Be Six Billion By The Year 2100

It has been estimated that if the present rate of increase continues the world will have no fewer than 6,000,000,000 people to feed, clothe and house by the year 2100—less than 170 years in the future. The number mentioned is regarded as about as many as the old earth can comfortably cater for unless its soil is taught to yield more bountiful crops than it does at present. To-day the world population is only about 1,900,000,000.

Dustless Auto Plates

German traffic police are testing a new license plate for motor cars with numbers which cannot be covered up by dust. The number is cut out of the plate in such a manner that the dirt flies through the openings of the figures.

Another myth in smithereens: Nero didn't fiddle while Rome burned for the simple reason that that city's conflagration came in 64 A.D. and the violin wasn't invented till many years after.

South Rhodesia will establish an air force reserve.

Lastex Fabrics Useful

Has Lately Been Used Extensively For Women's Garments

Lastex fabrics have played an increasingly important role during the past few years and promise to be popular materials for fall and winter wear.

Being impervious to water, Lastex made invaluable clothing suits for the summer, and likewise will go into the most ensembles for shooting, golf, skating and skating. Special tweeds woven with Lastex have been used for these sport suits with specially reinforced bands at the wrists and ankles of ski suits, to keep out the snow. There are leather sking gauntlets which fit closely at the wrist with jersey Lastex bands.

Lastex has been used extensively for women's underwear in tulle and lace as well as jersey. These garments have all the advantages of the strongest elastics without any of the disadvantages of old-fashioned corsets and girdles. Lightweight materials control the curves and can be laundered easily without losing any of their qualities. For large women, girdles and corsets are made of Lastex combined with a satin which has been reinforced by Lastex to keep the figure firm.

This same wonderful material is used in attractive weaves by upholsterers who have discovered that it is particularly practical for spring seats which were formerly covered by loosely cut plain fabrics to give play to the springs.

New Engineering Marvel

Installed The Longest Escalators In The World

After five years burrowing and boring and propping, casing, and otherwise safeguarding numerous overhead public services, the London Transport Board, as successors to the tube authorities, were able to open recently the new Leicester-Square Station. In many ways the achievement is an engineering marvel. Many difficulties had to be encountered which were unexpected. The work was carried on in a confined area underneath the busy traffic junction of Cranbourn-street and Charing Cross-road. Through one moderate-sized hole in the roadway thousands of tons of materials had to pass. The contractors used a million bricks, 7,000 tons of cement, and 1,350 tons of steel, and they excavated 34,000 cubic yards of clay. A circular book-hall with shops and showcases like those at Piccadilly, all artistically treated and with soft diffused lights, is a handsome feature of the building. There are five stairway entrances from the street, and three of the escalators are 161 feet long—the longest in the world—and capable of a speed of 180 feet per minute.

Man Flies Into Own Power

Drifts Two Miles Into Wind Before Opening His 'Chute

A parachute jumper of New Jersey is the 17-foot man to fly under his own power. With curious bat-like wings attached to his arms, he stepped out of an aeroplane at 8,000 feet, rode into the wind like a bird, and drifted two miles before he opened his parachute at 3,000 feet. The daring parachutist reported that he had been able to execute a "barrel roll" and one or two other flying tricks at the beginning of his drop. He has a strip of canvas, about three feet square, sewn between the legs of his jumpers. This, he says, enables him to change direction and execute stunts by kicking his legs and holding them at varying angles. After his parachute opened he landed unhurt in a tree. The theory that a man will be able to fly without the aid of a parachute is just a lot of hooey," he said. He added that as far as he knew his experiment had no practical value. It was just a good stunt. Previously, in February of this year, Mr. Clem Sohn, a 22-year-old parachute jumper, was reported to have flown under his own power at Daytona Beach after dropping from an aeroplane at a height of 12,000 feet.

FASHION FANCIES

Author Thinks 200 Men Are Masters Of Human Conscience

A thesis that five men "master the consciences of the mass of humanity" and that the world is "managed or mismanaged" by about 200 out of a population of more than 2,000,000,000, is presented by "the Unofficial Observer" in a book published in New York.

In a volume entitled "Our Lords and Masters," the anonymous author asserts that "of these 10 score potentates, barely 25 men rank as world rulers in their own right."

In the sphere of social behavior the five he lists as masters of human conscience are: King George V, Pope Pius XI, Leon Trotsky, the Emperor of Japan and Mahatma Gandhi.

Among the more mundane political potentates he lists as the eight outstanding world rulers: Right Hon. Stanley Baldwin and Sir Samuel Hoare of Great Britain; Andre Tardieu of France; Joseph Stalin of the Soviet Union; Benito Mussolini of Italy; Adolf Hitler of Germany; President Roosevelt of the United States and Mustafa Kemal Ataturk of Turkey.

Horseshoe Pitching

Americans Discard All Else To Play Barnyard Golf

Horseshoe pitching, better known as barnyard golf, is becoming almost as popular as bridge around Boston, Mass. Vacant lots have been turned into playing rinks and short tracts of land adjacent homes have been given over to the game, where the clanging of the irons is heard for hours at a time.

Women are becoming fascinated and many leagues have been formed, teams vying for honors with a competitive spirit that is almost amazing.

Any weight you may lose by excessive perspiration is shortly restored to your body when you drink water, tea, coffee, etc.

3 Sizes = 50c — \$1.00 — \$1.50

The \$1.00 size is nearly four times the 50c size and the \$1.50 size is twice the \$1.00 size.

Dr. H. W. Edwards, of the University of California, has developed a "panco" mirror, which reflects all colors alike. The new device is said to be 98 per cent. efficient.

Cold Winter Predictions Analyzed By Experts Who Make Study Of Weather

Will the coming winter be colder or will it be warmer than the average of winters?

A study of winter temperatures beginning with that of 1829, and covering New York, Philadelphia and Baltimore, does not afford an answer to the question. It presents an interesting fact, however—namely, that the average of the first twenty years of the period is nearly three degrees lower than that of the last twenty years, 32.6 degrees in comparison with 35.2 degrees. One cannot have a conclusion from this instance, but it is in line with broader and more extensive observations. It offers no clue to what we may expect in the winter now ahead. Forecasts in the case are uncertain of verification, writes Jacques W. Redway in New York Sun.

Popular traditions offset a warm summer with a cold winter to follow. Sometimes it happens that way, it is true, but if the mean temperature of the year is below the average both summer and winter usually are cold—and that, too, has exceptions.

Where there are no air movements and neither cloud nor dust to intercept the sun's rays the temperature of the air would rise with the number of daylight hours and the altitude of the sun above the horizon. Our winters would be cold for two causes—namely, the lack of sunshine and the low altitude of the sun, whose rays lose much of their effect as they fall slant upon the earth.

But other factors are to be considered. The air is ever in motion and cold waves from arctic regions sweep southward into temperate regions. When more than the average number visit us winter temperatures may fall below the average. Cold waves are of short duration, however, and a cold winter from that cause is rarely much below the average.

A cold year is another matter. It is a steady and progressive lowering of temperature over a great part of the earth. In 100 years of record in New York City, including fifty years of Weather Bureau, there have been six years in which the winter temperatures have been bitterly cold. The coldest of record, 27.5 degrees, occurred in 1835-36, when the mean temperature was nearly five degrees below the normal winter temperature. It was also a record cold winter in Philadelphia, the mean being the same as that of New York City.

The winter of 1885—and also the year—was also very cold, and a reason therefore was discovered. In 1884, Krakatau, a volcano in Sunda Strait, belched several hundred million tons of dust into the upper air. The resulting haze was so dense that the sun shone red in midday hours and blood red when at the horizon. The dust blanket was so dense that it intercepted a measurable degree of heat, causing a cold spell that continued for more than a year. There was no question about the character of the dust. Examined by scores of expert microscopists, it was found to consist of lava blasted into fine dust by the volcanic explosion; shot twenty miles into the upper air, it spread into a broad belt that girdled the earth. Dust below cloud height is quickly brought to earth by rain or by snow; above cloud height it falls by its own gravity and falls so slowly that the rate is hardly measurable.

The study of the dust blanket of Krakatau has made plain the cause of other severely cold years, both winter and summer. The "dry fog" in 1783, described by Benjamin Franklin; and that of the summerless year of 1816, which required a chapter of explanation in Thompson's "History of Vermont," was a volcanic dust blanket.

Will our coming winter be cold? In accordance with popular tradition it should follow a summer that has been rather warm. It may be cold—and it may not be. The five winters preceding that of 1933-34 were all warm, one being a fraction of a degree above normal temperature. Last winter was cold—nearly five degrees below the average of twenty years. To anticipate a cold winter would not be unreasonable, but a positive forecast would not be reasonable. There has not been a volcanic eruption of the kind that shoots dust clouds into the air, and there is nothing to show that the earth has been radiating more heat than it has received. When March 22, 1936, comes to us the weather sharpens who base their forecasts on goose-foot callipers will shoot "I told you so."

Seigneurs To Lose Rights

Quebec Municipalities May Be Permitted To Purchase Clear Titles

Seigniorial rights—last vestige of the ancient feudal system on this continent—are fast disappearing from Quebec by the appointment by the Quebec government of a rights purchasing commission under the Seigniorial Rights Abolition Act.

Introduced during the 17th century when eastern Canada was New France, seigniorial rights were granted to certain settlers as a colonization measure, entitling them to collect dues from farmers who took up land on their estates. In return, the seigneur agreed to use all his efforts to encourage settlement and clearing of the land. The farmers gathered at the seigneur's home on a certain day each year to pay their dues, known as cens et rentes.

Under the French regime 225 seigneuries were established, of which 190 still exist. Three hundred years ago the seigneur would accept a few cents in cash and the remainder of the dues in farm products such as wheat, fowl and vegetables. The present-day seigneur, however, demands the entire sum in cash and the habitant often finds it difficult to pay. Numerous complaints have led the government to take steps to abolish the tenure.

Under the French commission is studying is one by which the various rural municipalities would be entitled to buy out all seigniorial rights from the seigneurs, spreading the instalments over a period of 20 or more years.

Feeding Harvest Hands

Typical Country Experience When The Threshing Crew Come To Dinner

Not long ago a Kansas girl said she had never seen harvest hands sit down to eat. It is too bad that anyone should miss this typical country experience, but, after all, unless you had cooked the dinner yourself the full flavor of the occasion would be missing. You should get up early in the morning and bake four pies, two apple and two cream, while the men are milking. After breakfast you peel a dishpan of potatoes, chop up two heads of cabbage, and prepare the other vegetables in like amount, all the time fluttering to the stove to stick a fork in the roast and wondering if you put it on early enough.

You bring out all the extra table leaves, which take two table cloths to cover; you make tea and coffee, and on hot days men prefer the former—stir up a gallon of gravy, and hope you'll be ready when they quit. And then they come, talking loudly and laughing and joking as they take the wash pan and four clean towels to the well to wash up. And if you can see them come, dirty and dusty and shedding chaff, and still feel friendly, you have the true spirit of harvest time. But if you are resentful of their presence and grudging of your work, the pleasure of feeding a threshing crew is something you will never know—Flint Hills Peggy, in Cottonwood Falls Leader.

Many Will Agree

Somerset Maugham Dislikes Getting Up In The Morning

"I forget who it was," writes Somerset Maugham, "that recommended men for their soul's good to do each day two things they disliked: it was a wise man, and it is a precept that I have followed scrupulously; for every day I have got up and I have gone to bed." Although going to bed requires decision and is therefore unattractive, it is not a heroic act like getting up. The day includes twenty-four hours, with noon tossed in as a halfway mark between mere sloth and absolute abandon, but none of the hours is late enough to make getting up easy. Although unpleasant—perhaps millions of people get up promptly every morning without complaint, they are simply creatures of habit or necessity. "Oh, how I hate to get up in the morning," the old army ballad says. "It's nice to get up in the morning," Harry Lauder used to sing, "but it's nice to lie in bed." It certainly is. Getting up cannot compare with lying in bed—New York Times.

Although the king of England may refuse to approve any act passed by parliament, there is no record of any such action having been taken within the past 200 years.

Nazis Busy With Uniforms

Warehouse And Business Block Financed By Nazi Party Funds

A vast official "arsenal," covering two city blocks, for storing Nazi uniforms and accoutrements, is being completed at Munich. Keeping the Nazi in regulation brown uniform—with his "dagger of honor" swastika at his side—has now become a major industry in the third reich.

This new business remains firmly in party hands. The huge warehouse and business block is financed entirely by Nazi party funds. Prices of all pieces of uniform are dictated by party chiefs and profits go into the party treasury.

The new buildings, officially entitled "The National Ordnance Department," are four storeys high, built of steel and cement and include a garage for 50 high-power trucks. Business is brisk as each Nazi party branch—storm troops, Black guards, party officers and Hitler Youth, et al.—has its own individual paraphernalia. They are all minutely prescribed by the party ordnance chief, down to the size and shape of tent-stakes, which are made of metal. A full Nazi uniform, cheapest quality, including pack, boots, canteen etc., can be obtained for about \$25.

Wireless direction finders for ships are being installed along the South African coast.

Taken Of Goodwill

Winnipeg Receives Quarter Ton Of Raisins From Australia

A quarter of a ton of raisins was presented to the city of Winnipeg recently. The presentation was made to Mayor John Queen by L. R. MacGregor, Australian trade commissioner in Canada, as the mayor opened a local Australian exhibition. The raisins are to be distributed among the public institutions of the city, among those on relief, or among the poor, Mr. MacGregor said. The gift was being made as a mark of appreciation of Canadian goodwill towards Australia.

The Value Of Paper

Few People Realize What It Means To The World

Arthur Pond in Atlantic Monthly says lacking paper, history would be almost a blank; geography still a fable; poetry a harpist's song by the fireside; trade a matter of simple barter, and the productive arts still under rule of thumb. Each generation, instructed only by the word of mouth by elders schooled through crude experience, would have had to repeat in its own time, the errors of its forefathers, and all human knowledge would have been at the mercy of precarious memory.

Fifteen girl students of India recently toured Europe.

The SNAPSHOT GUILD

IT'S FOOTBALL TIME

Enlargements of long distance shots will often bring out the "action" detail of football play (left). A shot from the side lines (right).

Hold that line! Hold that line! Yes, football season is with us again with its excited yelling crowds, raccoon coats and joyous celebrations by supporters of the winning team.

What a paradise for the snapshot shooter! He who goes to the game without his camera is missing a golden opportunity. Pictures of the game, the crowd in the grandstands and informal shots of his classmates and friends will furnish him many hours of pleasure year after year as he looks back through his snapshot album.

There are countless opportunities for interesting, story-telling pictures at football games. All you have to do is use a little imagination. When you are blocked in the traffic and remark to the girl friend, "Gee, look at that line-up of cars and that snapping a straight line of cars. Stand on the bumper and shoot down on the traffic and crowds. The re-

sults will be much more pleasing than the ordinary, conventional view.

The period before the start of the game offers further opportunities for unusual snapshots. For instance, take a picture from the top of the grandstand steps showing the crowds coming up the steps to their seats. A shutter speed of 1/50 of a second will stop the motion of the people as they walk directly toward your camera.

Stand on your seat and take a full view picture of the crowds in the grandstand and as you do this you may see some of your friends seated nearby. Attract their attention and as they wave with a cheery, "Hey, Bill," you can snap another interesting story-telling picture. Even a chance, "blind" shot over your shoulder may bring unusual and pleasing results.

So-to-day that your camera is ready for action, load it with film and leave for the game determined to get the kind of pictures you will be proud to show your friends.

JOHN VAN GUILDER.

Increasing The Use Of Agricultural Products In The Automotive Industry

Ninety-three million honey bees are on the pay roll of one of the largest makers of American automobiles—\$3,000,000 buzzing, busy bees turning out beeswax, which is used for various purposes in the automotive industry.

Besides, writes Malcolm McDowell in the Chicago Daily News, the same motor maker employs 800,000 sheep, 87,000 goats, 10,000 cattle and 20,000 hogs, which contribute raw materials available in his factories.

When to all these industrialized creatures are added 112,000,000 feet of lumber, 2,400,000 pounds of linseed oil, 500,000 bushels of corn, 341,000 pounds of castor oil, 2,500,000 gallons of molasses, 69,000 pounds of cotton, 1,800,000 pounds of soybeans, 2,000,000 pounds of turpentine and 728,000 gallons of tung oil you get some idea of what American farms supply, in one year, for just one make of automobiles and that without considering the agricultural products of ill-tature and other automobile manufacturers use annually.

Increasing the use of agricultural products in the automotive industry is one of the major purposes on the program of the Farm Chemurgic Council. In forwarding this purpose a number of investigations by industrial chemists, under the general supervision of the research section of the council, will be carried on to develop new sources of raw material to be contributed by farmers and which can be made available in the automotive industry.

It follows, say chemists, that if bee hives are supplying material usable by automobile makers, they can do the same for other industries. Consequently, it is safe to venture the prediction that the busy bee will not escape the scientific curiosity of the research chemists, seeing that 93,000,000 bees are now working for one auto concern.

Contact already has been made by the Farm Chemurgic Council with the American Honey Institute of Madison, Wis. The institute has contributed much interesting and informative data concerning bees and their products. The following is gleaned from the material supplied by the American Honey Institute.

Besides its general and longtime use as human food, honey, industrially, is utilized in many products. It may be found in the centre of golf balls; it is a medium for curing tobacco pipes; it is an astringent in certain types of cosmetics; gums are boiled in honey to enhance their beauty; it is an important ingredient in tooth pastes; it is used as a polish for kid shoes; it enters into a water-proofing for leather and is available for many other industrial purposes. Beeswax has numerous uses in the arts and trades and it is made of honey by the bees. Eight to ten pounds of honey are consumed by the bees to produce a single pound of beeswax.

The sweet sought by bees in flowers is not honey; it is similar to sweetened water and is called nectar. Honey is the nectar of flowers, evaporated and modified by the bees. Actual weightings have shown that it takes 20,000 bees to bring to the hive one pound of nectar, which will make about a quarter of a pound of honey.

So it would require the full time of 80,000 bees to bring in enough nectar to make a pound of honey and 80,000 more bees must turn themselves into ventilators by buzzing their wings inside the hive to produce the air currents to evaporate the water from the nectar. Thus 160,000 bees must work to store up a pound of honey in their hive. Small wonder, then, that the automobile maker has put 93,000,000 bees on his pay roll.

Industrial chemists do not believe that honey and its main by-product, beeswax, ever will enter largely into the industries; they have regarded bee hives as the special responsibilities of agricultural chemists. Nevertheless, when they check up the thousands of surprising discoveries made in the research laboratories by chemists investigating the industrial possibilities of corn, artichokes, potatoes, hemp, eggs, fruits, weeds, and other farm products they believe that honey, chemically known as a monosaccharide and which is much the same sugar that is found in most fruits offers a promising field for industrial research.

It contains, besides levulose, said to be the sweetest of sugars, and dextrose, mineral elements such as iron, lime, sodium, magnesium and phosphoric acid. It would not be surprising if the

chemical investigator would discover in honey a medicine as the known properties, productive of wonderful effects.

That the bees will be subjected to a most exhaustive investigation in the laboratory of a research chemist seems to be certain. The fact findings of the investigator may lead to a much greater appreciation of its importance in the industrial and economic fields than now is apparent.

Thought Pictures

Use Scientific Instruments To Show Thoughts On A Screen

The latest triumph of scientific cinematography, is the taking of film pictures of a man's thoughts. The experiment was carried out at the Moscow Institute of the Brain. It has been known for some time that the brain in the process of thinking, generates minute electrical currents. Several preliminary experiments were, therefore, carried out on animals, recording their responses to such outside influences as light, heat, and cold. The latest experiments have been on human beings. The patient sits facing the movie camera and two minute needles are pressed into the bone of the temples. These are connected to wires which conduct the electric currents set up by the brain in action to a transformer. Here the impulses are magnified one thousand times and the needles are pressed into a hand on a dial. A slowly-moving film photographs the movements recorded on the dial. When the brain is at rest the fluctuations are small and regular and appear on the film as a perfectly straight line, but as soon as a question is fired at the patient the mental stimulus engendered by thinking sends the needle on the dial flashing backwards and forwards and the film records rugged ranges of peaks and valleys, finally settling down into a straight line as the patient co-ordinates his thoughts and prepares to answer. The device is intended for use in the cure of mental ailments; when it is possible to classify by comparison with normal thought records, the abnormal brain processes of a mentally deranged person, doctors will more readily be able to apply corrective measures to unruly thoughts.

Timothy Seed Prices

Large Production This Year Has Depressed Prices

Recently the Markets Division of the Seed Branch, Dominion Department of Agriculture, Ottawa, released a study of seed crop report which indicates an abnormally large production of this seed in Canada in 1935. It would appear that there may be about eleven million pounds of seed available for commerce as against five million pounds in 1934 and an annual consumption in recent years of approximately seven million pounds. Owing to the surplus in sight, Canada is now for the first time in history on an export price basis in respect to this seed. In past years prices at Chicago plus freight and import charges were the basis of value in Canada, whereas this year, domestic prices may be based on Chicago quotations less freight and export charges. As a result of this changed situation prices are now very low. At this time last year timothy seed was selling in Canada at fifteen to twenty cents per pound as against three to four and a half cents per pound at the present time. Surplus production this year resulted from two main factors, i.e., the high prices of last year which stimulated production and the abnormally large hay crop which permitted farmers generally to leave fields for seed rather than cut for hay.

Can Now Enjoy Talks

British Admiral Presented Picture Apparatus To Leper Hospital

When Admiral Sir William Fisher, Commander-in-Chief of the British Mediterranean fleet and an enthusiastic film fan, was told during his recent visit to Malta that the lepers never went to the movies because they were forbidden to leave their camp he presented a talking picture apparatus to the hospital. One of the first pictures shown was of the Jubilee in London. The lepers have placed a life-size portrait of Admiral Fisher in the hospital.

In winter when there is little sunshine, chickens feed should contain cod or sardine liver oil at the rate of one to two teaspoons each hundred pounds of mash.

WORLD HAPPENINGS BRIEFLY TOLD

Anna Ilyinichna Yelizarova-Ulyanova, sister and close collaborator of Nikolai Lenin, died at Moscow at the age of 71.

Joseph Charlebois, artist and cartoonist, well known for his work in La Presse, Montreal, died in hospital here in that city recently.

Regular fall upswings of agricultural exports was reported by the commerce department to have lifted total United States exports 15 per cent. between September and August.

A striking longshoreman was shot to death at Port Arthur and two union dock workers were missing after non-union workers and a group of men engaged in hand-to-hand fighting.

The council of the international labor bureau of the League of Nations may designate Canada to occupy the seat in the bureau made vacant by the withdrawal of Germany from the league, it was reported.

Of the 10,579,518 bushels of wheat imported by China in the first four months of 1935, Australia supplied 7,531,836 bushels. Argentine supplied most of the remainder while imports from United States and Canada were negligible.

All premises used as grasshopper poison mixing stations were condemned by the Manitoba government as unsuitable for living quarters for any person. The action was taken as a result of 25 roadworkers, housed in a mixing station, being stricken with poison recently.

Purchasers of new cars in November and December this year will not be required to buy a part-time 1935 Ontario automobile license, it has been announced. Instead, these purchasers can buy their 1936 plates after Nov. 1 and these licenses will carry them to the end of December, 1936.

Canton Takes Action

Would Bar Small Merchants From Importing Old Newspapers

The practice of small merchants in China, who wrap purchases in old American newspapers, may be halted by a measure put before the Canton Government to curtail such importations, the Department of Commerce reports.

The extent of the practice is shown by the fact that the city of Canton alone imported over \$1,000,000 worth of such old newspapers in 1934. Chinese paper manufacturers succeeded last year in stopping the merchants from so wrapping fresh foodstuffs, the Commerce Department said, and it is now planned to prohibit the importation of old newspapers.

South Africa's 1935 maize crop is estimated at 17,941,000 bags.

HINDS
Honey's Almond
CREAM

Was Famous Cartoonist

Sidney Smith Creator Of The Gumps,
Killed In Automobile Accident

An automobile crash in Illinois ended the career of Sidney Smith, cartoonist-philosopher, who made "Oh Min" and "Soup's On" household phrases in many lands.

The veteran creator of "The Gumps," "Old Doc Yak" and "Ching Chow" who dropped pearls of wisdom and humor from his lips each day, was dead when they removed him from the wreckage of his car.

Smith, who was 58, ranked with Claire Briggs as probably the greatest portrayer of family life through the medium of cartoons. The little doings of Andy and Min Gump, Little Chester and the fabulously wealthy Uncle Ben, their joys and their sorrows, have been a comic page feature for years.

More recently Smith introduced "Ching Chow," a little Oriental of few words and much wisdom. This box cartoon was made to tell readers such things as "The slave has no one master—the ambitions as many as there are people likely to be useful to him."

Smith's noted career started when he was but 18, making him one of the real oldsters of the game. The ranks of the veterans are thin, "Gus" Herriman, artful drawer of "Krazy Kat" and Bud Fisher, creator of "Mutt and Jeff," remaining as probably the two best known among the old hands.

Among the intimate little twists Smith got out of his work was the license number 348. Long ago it appeared on Yak's auto. Then he transferred it to Andy Gump's half-pint gas buggy. Only Smith's intimates knew that 348 was the cartoonist's own motor permit number and was issued to him for many years.

Smith's attorney, E. Williams, disclosed that a few hours before the fatal journey the cartoonist had renewed his contract with the Chicago-Tribune-New York News syndicate. He said it stipulated the payment of \$750,000 for a five-year period.

A native of Bloomington, Ill., Smith had been a staff member of the Chicago Tribune since 1911. He began his career as cartoonist on the Bloomington Eye in 1895.

New Gold Discovery

Several Groups Of Claims Staked In
Ontario Near Manitoba Boundary

A new gold discovery in the northwest corner of Ontario, where several groups of claims have already been staked was announced by Hon. Paul Leduc, Ontario minister of mines, who said the new area "appears a favorable one for prospecting."

David Foster, prospector for a Winnipeg group, was credited with the discovery. The area, it which quartz exposures were said to exist in three places over some 300-foot square, 40 miles east of the Manitoba boundary and more than 200 miles north of the Red Lake discovery. It surrounds the Sachigo river.

On Roof Of World

Successful Truck Gardening Is Possible At High Altitudes

Potatoes and other vegetables will grow at an altitude of over 7,200 feet in the Pamirs, "the Roof of the World," according to Professor M. E. Baranov, who recently conducted experiments for the Soviet Government. He declares that truck gardening is possible in the lofty mountains. The potatoes were grown from seeds, and tomato, cabbage, pepper and egg plant seeds are successfully taking root.

Huge Sum In Tips

Chimney Sweeps In Yugoslavian
Town Earn Good Money

Last year the 27 municipal chimney sweeps of Zagreb, Yugoslavia, earned between them, apart from tips \$130,000—almost \$50,000. This is far more than many bank managers earn there. Sweeps in Zagreb are paid a monthly sum whether the chimneys need sweeping or not. They are then responsible for the cleanliness of all chimneys and for any fires due to chimneys not being properly cleaned.

New Surgical Discovery

Disintegrating Plaster Produced By
Dentist And Returned Soldier

Product of a Toronto returned soldier and a dentist, a disintegrating surgical plaster, which overcomes the necessity of cutting or sawing plaster casts for removal, was shown in Toronto at the convention of the Ontario Hospital Association. It was discovered by John Audley-Charles, returned soldier and practical chemist, and Dr. J. S. Lapp, dentist.

Efforts are being made to establish Cochran as a principal port of India.

A Law Every Mother Should Know and Observe

Never Give Your Child An
Unknown Remedy without
Asking Your Doctor First

According to any doctor you ask, the only safe way is never, give your child a remedy you don't know all about, without asking him first.

When it comes to "milk of magnesia," that you know everywhere, for over 60 years, doctors have said "PHILLIPS' Milk of Magnesia for your child."

So—always say Phillips' when you buy. And, for your own peace of mind, see that your child gets this, the finest men know. Made in Canada.

Safety for You and Yours
Phillips' Milk of Magnesia

PHILLIPS'
Milk of Magnesia

Place Men On Farms

Alberta Government Planning To
Care For Single Unemployed
Men

A plan under which from 3,000 to 4,000 single unemployed men would be placed on farms this winter is being considered by the Alberta government, Premier Aberhart stated. The plan is an extension of the farm scheme operated during the past two years. While the unemployed men would be given \$5 a month as formerly, a similar sum would also be paid to the farmer.

Another suggestion is that such unemployed placed on farms under this scheme would not be required to work more than five hours a day.

Paving the way for the \$5 minimum cash payment monthly to rural families in need of relief, an order-in-council has been passed by the provincial government. As a result, municipal secretaries are being circulated in order that the plan can be brought to the attention of rural authorities and the extent of the response gauged by the government.

The plan was outlined recently by Premier Aberhart who said it was not to be regarded as providing a real "basic dividend." While the minimum amount was set at \$5 which would be provided by the government, the municipality would be expected to match it with \$2.50. As compensation for its contribution, the municipality could require the relief recipient to give some return in labor. If the size of the family justified more than the minimum, this would be provided, and as the increased, the municipality's share would be proportionately increased.

Applying For A Job

Girl Stated Qualifications But Neglected To Sign Her Name

A girl applied yesterday to Walter Lister, city editor of the Post, for a reporter's job—but was disappointed. "Are you prejudiced against women in the newspaper game?" she asked. "Mr. Lister replied: 'It isn't that I'm prejudiced—but I find that most of them are careless and sloppy in their work.' Send me a letter, though, listing your qualifications, and I'll place it on file." The letter arrived—a two-page note, carefully typewritten, and listing qualifications tending to offset any suggestions of carelessness. The lady, however, forgot to sign her name—Leonard Lyons, in New York Post.

Runs Into Misfortune

First Woman To Swim English
Channel Has Hard Luck

Gertrude Eder, the girl who ten years ago was the first woman to swim the English channel, can now swim only a few feet. Her back injured in a fall, she is fighting to retain the control of her legs. In addition, misfortune has dogged her in that she has become partially deaf because of all the swimming she once did, and the money she made after her channel swim has been lost on unwise investments.

Canada is larger than the continental United States by approximately 500,000 square miles.

SUNDAY SCHOOL LESSON NOVEMBER 8

JUDAH TAKEN CAPTIVE

Golden text: Righteousness exalteth a nation; But sin is a reproach to any people. Proverbs 14:34.

Lesson: II. Kings 24:1 to 25:21; Jeremiah 39:1-15.

Devotional reading: Psalm 107:10-16.

Explanations And Comments

The Siege of Jerusalem, verses 1-3. In the ninth year of Zedekiah's reign, 586 B.C., in the tenth month according to the Babylonian calendar (which numbered its months from the spring season, the tenth month corresponding to our January and on the tenth day of the month, Nebuchadnezzar, king of Babylon, came with his army and besieged Jerusalem. "The nation never forgot the month and the day on which the armies of Chaldeans finally invested the city. It was felt as the day of the deepest gloom by the Israelite exiles, Ezekiel 24. It has been commemorated as a fast, the Fast of Tebet, ever since in the Jewish Church" (Dean Stanley).

The Flight from Jerusalem and the Fate of Zedekiah, verses 4-7. When a breach was finally made in the city walls, the Israelites fled by night by the way of the gate between the two walls, which was by the king's garden. This gate was on the south of the city. The Israelites must have known that there was little chance of making good their escape, for the Chaldeans surrounded the city.

The Fate of Jerusalem, verses 8-10, 13-17. On the seventh day of the tenth month, Nebuzaradan, the captain of Nebuchadnezzar's guard (literally "chief of the executioners," the bodyguard to whom such duties belonged), came to complete the destruction of Jerusalem. The work of devastation was thoroughly done. The gold and silver vessels, and the pillars and vessels of brass of the temple were saved to be carried to Babylon, and then the sacred temple, on which such a passion of love had been lavished, was razed to the ground. The king's palace and every great house in the city were burned, and the city walls were broken down.

The Fate of the People, verses 11, 12, 22. The commander of the body guard carried off as prisoners the people left in the city and those who had already surrendered to the king of Babylon, as well as the rest of the masterworkmen (Moffatt's translation). The poorest of the people were left to cultivate the land, as vine-dressers and husbandmen.

Canadian Premiers

Fifteen Ministers Since The Time Of Confederation

After all these weeks of discussion of Canadian affairs, how many could name the premiers since Confederation, 1867? Sir John A. Macdonald, 1867; Hon. Alexander Mackenzie, 1873; Sir John A. Macdonald, 1878; John Abbott, 1891; Sir John Thompson, 1897; Sir Mackenzie Bowell, 1894; Sir Charles Tupper, 1896; Sir Wilfrid Laurier, 1896; Sir Robert Borden, 1911; Rt. Hon. Arthur Meighen, 1920; Rt. Hon. W. L. M. King, 1921; Rt. Hon. Arthur Meighen, 1926; Rt. Hon. W. L. M. King, 1926; Hon. R. B. Bennett, 1930; and now add Rt. Hon. W. L. Mackenzie King, 1935. There have been fifteen ministries, two being headed by Sir Robert Borden during his tenure of office, one being Conservative and the other the Unionist War Cabinet.

"I am sorry," she said, "but I could never marry a red-headed man."

"Then may I propose again next year?" he asked.

"But it will be the same thing then."

"No; my hairdresser says I shall be bald in a year."

For home to look good to many people, it is necessary for them to get a long distance away from it.

Brookes

PATTERN 5458
The toque is again in high favor with Dame Fashion. She well knows how easy it is to wear. And this one in crochet meets with her loud approval for all her forecasts point to crochets as an outstanding note for Fall and Winter. The toque is so simple to make and has, as chief decoration, a cable effect that is very lovely. The muff—purses—and how we all love that—repeats the design of the toque. Its shirred ruffle and fullness give it a feminine note that will add much to your appearance. In pattern 5458 you will find complete instructions for making the set shown; an illustration of it and of the stitches used; material requirements. To obtain this pattern send 20 cents in stamps or coin (cash preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

There is no Alice Brookes pattern book published

Select Base For Ocean Hops

Nearly Two Million Dollars Set Aside
For Air Site

A 900-acre property four miles from Sydney, N.S., has been selected as the site for a \$1,750,000 North American terminus of the projected ocean air service, C. H. Clendinning, chairman of the Irish Transatlantic Air Corporation, announced recently. Owned by the Nova Scotia government, the property has been deemed to the corporation and will be developed along the lines proposed for the eastern terminus at Londonderry, northern Ireland.

Planning the "quickest practical route" for air transportation between the Old Country and North America, the chairman said the terminus at Sydney would be leased to other corporations connecting the ocean service with Canadian and United States lines. The planes, he said, would provide accommodation for 45 persons beside facilities for handling mail.

Nigeria, British possession, is seven times larger than England and has an area of approximately 372,674 square miles. It has more people than any other British dependency except India, 20,000,000 having their homes there.

A rare Bible, known as the "Vinegar" Bible, because the word "vinegar" appears instead of "vineyard" in the parable of the vineyard, has been restored to Easby Church, Kent, to which it originally belonged.

The first making of brass in North America was attempted by John Winthrop, Jr., in his iron foundry at Lynn, Mass., in 1644.

A Bean For A Meal

Natural Growth Is Five Or Six Feet
In Length

One of the first Australian beans on the North American continent, grew at the rate of one inch a day in a back yard garden plot in Roseville, Mich.

The bean, produced by Louis Jeffries, a disabled war veteran, has attained the length of 31 and one-half inches and is 10 and one-half inches in circumference.

Jeffries' vegetable prodigy is one of two on a vine produced from seed sent to the veteran by a friend in New Zealand.

"The soil is different here and the climate is too cold," Jeffries remarked to questioners. "I expect each of my beans will be big enough to provide a square meal before they stop growing."

Jeffries, an electrician before the war, has been able to work only as a watchman since he was disabled in service. He has devoted his spare time to developing unusual vegetables, fruits and hybrids in his small garden.

The Australian bean, pale green in color, grows to a length of five or six feet in its native soil. It is highly esteemed as food.

Japan's new Film Control Society will enforce a strict censorship on newreels.

HEAVY WAXED PAPER

PLAN MERGER OF DEPARTMENTS IN FEDERAL CABINET

Ottawa.—Assembling of a Dominion-provincial conference at an early date, reduction in the size of the Dominion cabinet by merger of departments and adoption of the British system of appointing parliamentary under-secretaries to assist cabinet ministers were three announcements made by Prime Minister Mackenzie King.

As soon as the new cabinet had been sworn in Mr. King issued a statement explaining his views on these matters.

Prime Minister King intimated that after the government was sworn in cabinet council immediately discussed preliminary plans with respect to calling of the Dominion-provincial conference, composition of the national unemployment commission and matters relating to trade with Great Britain, United States and Japan.

Finance Minister Dunning will have, in addition to provincial financing, the question of heavy re-funding operations to deal with.

Many administrative changes will result from the merger of six departments which involve the disappearance of three portfolios. Transportation will be gathered into one jurisdiction with the merger of railways and marine departments, the interior department will be merged with immigration and colonization, and the office of solicitor general disappears completely with the duties of that minister taken over by the minister of justice.

All these changes will require legislative action and numerous staff and office adjustments. Considerable reorganization will be required also to bring about proposed adoption of the English system of parliamentary secretaries to the ministers of major departments. Members of the House of Commons will be chosen in the same manner as ministers are selected, to act as assistants to the ministers of certain departments. They will be on full time with salaries, and, while not attending meetings of the government will be empowered to speak for their departments in the House of Commons, thus relieving the ministers of a burden which, in some instances, has proven heavy.

Search For Meteor

Excavation Work Carried On In Manitoba District

Fortier, Man.—A crew of men worked to excavate what is believed to be a meteorite that thundered out of the skies during a severe electrical storm Oct. 15.

Residents of this district, 35 miles west of Winnipeg, declared a "strange noise" was heard during the night. The next day a hole 12 inches in diameter was found within 40 feet of the home of Cornelius Giebrecht and within 70 feet of the general store of A. B. Manning.

The noise was first believed to have been lightning striking the ground. Later the belief was expressed it might have been a meteor. No indication of the meteor has yet been uncovered but excavation work is under way at the scene.

Excavation work is under direction of Prof. V. W. Jackson, of the University of Manitoba.

Canada At League

Seat Given On Governing Body Of International Labor Office

Geneva.—Canada was unanimously elected to the governing body of the International labor office in succession to Germany. In acknowledging the election, Dr. Walter Riddell, the Dominion's advisory officer here, said it came at a time when the interest of the Canadian people in social and industrial problems was greater than ever before.

The government body selected Dr. Riddell as chairman.

The international labor office is closely connected with the League of Nations, but has a parallel organization of its own here, also set up by the peace treaty of 1919. The governing body consists of 12 representatives of member governments. It organizes international conferences with view to agreement on enforcing higher standing of labor.

Will Attend Naval Conference

Rome.—Informed quarters here believed Italy's participation in the naval conference planned for London in December was "virtually assured." Although no official statement has been issued, it is understood Italy is unlikely to refuse to attend.

Heavy Taxation

Hearst Claims Nearly Ninety Per Cent. Of Income Goes To State

Hollywood, Calif.—William Randolph Hearst, in a letter to the Hollywood editors of Variety, declared that high California taxes have compelled him to close his place in this state "and live almost entirely in New York."

Pouncing upon the recently enacted California income tax, the publisher expressed fear a large number of people "with considerable incomes" are planning to reside elsewhere, and foresaw an opportunity for development of the motion picture industry in states with easier taxes.

"The California income tax goes to 15 per cent.," the letter said. "Add to this the federal income taxes and the New York taxes, plus many other taxes, and I find that over 80 per cent. of my income will go in taxes—in fact it may be nearer 90 per cent."

Important Measures

Alberta Premier To Take Steps To Relieve Hardships In Province

Edmonton.—Forecasting important measures to relieve farm debt burdens and hardship in Alberta, Premier Aberhart warned that no one need think that all he had to do was to sit back and wait for basic dividends to come.

At an official luncheon tendered the new Social Credit government by the city of Edmonton, Premier Aberhart said: "You will shortly hear of a way that farmers can get out from under their heavy mortgage load."

The premier pleaded for sympathy and co-operation and promised that a single step would be taken by the government without the best expert advice.

May Repudiate Pacts

Sir Herbert Samuel Refers To The Ottawa Agreements

London.—Sir Herbert Samuel, leader of the Liberal opposition, in the House of Commons, interpreted the election defeat of Prime Minister R. B. Bennett as repudiation of the Ottawa economic agreements by the people of Canada.

During a discussion of the international situation, Sir Herbert said the agreements reached at the Ottawa imperial conference of 1932 were one of the main causes of the present unrest.

"The world had taken those agreements," he said, as an indication the British Empire was to be made into a closed system.

Uncover Plot

Soviet Authorities See Plans To Disrupt Rail Traffic

Moscow.—Soviet authorities announced that police at Kiev had uncovered an important counter-revolutionary plot involving plans to disrupt rail traffic in certain sections of Russia.

Twenty persons were arrested at Kiev, all said to be followers of Leon Trotsky, exiled Soviet leader and proponent of world revolution. They will be accused before the Kharkov tribunal of fostering plans to sabotage the Soviet Union's already seriously handicapped communications system.

May Be Candidate

Sir Malcolm Campbell, Racing Driver, May Enter Election Contest

London.—Sir Malcolm Campbell, the racing driver, notified the Bedford Conservative Association he is willing to stand as a candidate for the division at the general election, in place of Denis Hanley, who is retiring.

Arthur Roy Duceaux, son of Sir Arthur Duceaux has been named to stand for Carnarvon against David Lloyd George. Mr. Duceaux is barely 23 years of age, a graduate of Oxford. He will be admitted to the bar in January.

Sanctions Approved

Durban, Union of South Africa.—Three resolutions designed to hinder Italy's campaign in Ethiopia were passed at a meeting of 800 persons in the city hall. The resolutions called upon the government to prohibit the export of meat to the Italian army, to cancel the Italian shipping subsidy and to put in force any further economic sanctions within their power.

A Careful Driver

Edmonton.—Presentation of a watch to Alex Williamson, truck driver, in recognition of his driving 273,000 miles on the Edmonton-Calgary highway without an accident, was made by directors of the Alberta Motor Association.

MILITARY ACTION IS NOT PROPOSED AGAINST ITALY

London.—Sir Samuel Hoare, foreign secretary, issued an appeal for an honorable settlement of the Italian-Ethiopian controversy and said Great Britain had no intention of acting alone to halt the campaign in East Africa.

Sir Samuel outlined in detail the progress of the quarrel between the two countries in opening debate in the House of Commons on the international situation.

Sanctions to be taken against Italy were economic and not military, he said. "We have never even proposed to the French consideration of any military measures."

Certain countries failed to realize, said Sir Samuel, that "most of us regard the league as a bridge between Great Britain and Europe and that if this bridge is gravely weakened or broken, co-operation between us and the continent becomes difficult and dangerous."

He said they "did not realize the sincerity of our hope and faith in the new order of international relations. They failed to understand our belief in the league as an instrument, not only for stopping war, but also as an instrument for removing its causes."

The foreign secretary emphasized that Britain's interest in collective security and world peace was the motive for her firm stand at Geneva. "No thought of imperial interest save a natural concern, which a world-fung empire must feel for preservation of world-wide peace, has entered into our minds."

Towards the end of his speech Sir Samuel said: "The league, let us remember, is a great instrument of peace. Let critics remember this fact when they say that we ought at once to close the Suez canal and cut Italian communications."

Such action, taken alone, would destroy Britain's contention that "this is not a quarrel between Great Britain and Italy." There would never be collective agreement for such action, he declared.

Sir Samuel's speech was followed by vigorous opposition attacks upon government policies, led by Major Clement Attlee, Labor, and Sir Herbert Samuel, Liberal, which furnished a keynote for the election, expected to be fought out largely on international issues.

Sir Samuel urged that the short breathing spell before the application of economic sanctions against Mussolini's government be used in another attempt for peaceful settlement of the Italo-Ethiopian conflict.

The foreign secretary, addressing commons on its resanctioning, asked if an eleventh hour chance cannot be used to make unnecessary further progress along "the unattractive road of economic action against a fellow league member, an old friend and a former ally."

Arctic Route

Moscow.—Steam navigation from Europe to the far east by way of the Arctic ocean has been put on a practical basis, Otto Schmidt, head of the Soviet northern sea route department, reported to Joseph Stalin.

LONDON'S NEW LORD MAYOR

Our picture shows Sir Percy Vincent, the new Lord Mayor of London, right, after the service at St. Lawrence Jewry Church, with Sir Stephen Killick, the retiring Lord Mayor.

ARTHUR HENDERSON

Noted British labor leader and president of the world disarmament conference, who died Sunday, Oct. 26. The 72-year-old British statesman won the Nobel peace prize in 1934.

Waterways Treaty

St. Lawrence Project Awaits Ratification From Washington

Ottawa.—Defeat of the Bennett administration and inauguration of a ministry headed by Liberal Leader King will make no difference in the status of the St. Lawrence waterways treaty with Washington, it was said here.

The treaty will remain pigeonholed until ratified by the American senate by a two-third vote. Then the new government would be forced to consider it and have it either passed by parliament or defeated.

Although Premier-elect King has never made public his views on the treaty, two of his provincial lieutenants, Premier Hepburn of Ontario and Premier Taschereau of Quebec, have opposed it, the former most strenuously.

Cost Of War

Italy Is Paying Heavily For Operations In Ethiopia

Geneva.—Statistics of the Bank of International Settlements sent to the League of Nations indicated the cost to Italy of the Ethiopian war.

The figures showed during the first 10 days of October the bank of Italy lost 200,000,000 lire in gold. Experts estimated if this figure is taken as an average, about 453,000,000 lire, or over 10 per cent. of the Italian gold reserve at the end of September, has been withdrawn in the past three weeks.

Goos To The Front

Rome.—Dr. Filippo Tommaso Marinetti, poet and author and Italy's "Father of Futurism," called for East Africa to join troops in East Africa as a captain. News of his calling caused amusement in military circles, because although Marinetti is acknowledged to be a good soldier, he holds two Great War medals for Italy—he is more famous as a bizarre artist.

Boy Actor

Freddy Bartholomew Becomes Legal Ward Of Aunt

Los Angeles.—Freddy Bartholomew, 11-year-old screen actor, became the legal ward of an aunt, Miss Mylicent Mary Bartholomew, and in the superior court hearing gave his opinion on what happens to boys who tell lies.

Attorney Felix Cunningham, representing Miss Bartholomew, asked the child actor if he understood what it meant to swear to tell the truth and then what happens to boys who do not.

"They probably go to hell," said Freddy candidly.

The boy's parents, Mr. and Mrs. Cecil Llewellyn, now in England where Freddy was born, opposed the guardianship petition.

Miss Bartholomew testified she had had exclusive care and custody of Freddy for eight years and had carefully explained the reason for the trip to Hollywood to his parents. She said the young actor had a contract to work 40 weeks each year in pictures at \$1,000 a week.

PAYS A TRIBUTE TO THE GOODWILL OF CANADIANS

London.—The Earl of Bessborough, speaking at a dinner tendered him by the Canadian club, urged that more people travel between Great Britain and Canada and paid warm tribute to Premier Minister R. B. Bennett and Prime Minister-elect Mackenzie King.

The earl, who has just completed a term as governor-general of Canada, recalled with approval the suggestions made by Premier Baldwin at the Ottawa imperial conference of 1932 for exchange of civil servants between Whitehall and Ottawa.

The former governor-general paid tribute to the goodwill shown him by Canadians. He owed a great deal to the assistance of Lady Bessborough.

"If any of the many kind things said about us in Canada are true, the credit is due entirely to my wife," he said.

Mr. Bennett, he declared, was respected by people of all political parties in Canada. The earl described Mr. Bennett as a prodigious worker, of phenomenal memory and great ability, with a particular knowledge of financial and legal questions.

"During my time in Canada—one of unexampled depression—difficult problems presented themselves continuously, some of them of great urgency. However burdened or exhausted by the duties of office, I always found Mr. Bennett in our personal relations most patient and considerate, ever ready to give his best in any questions that arose—a staunch and loyal friend for whom no pains were too great to help his friends."

"His Majesty's government has no more devoted servant and in the cause of empire no more convinced adherent."

The former governor-general recalled that when he arrived in Canada, "the first thing that Mr. Mackenzie King said to me was that if there was anything the opposition could do to assist me he was entirely at my disposal. In one year that followed he was as good and better than his word. Our personal relations at all times were of the most delightful character."

Hon. G. Howard Ferguson, Canadian high commissioner in London, was given an ovation by the gathering. He paid tribute to the great public services of the Earl of Bessborough in Canada.

"He lived up to the highest ideals of British public service and exercised an influence steady in effect and helpful in guiding Canada through one of the most depressing periods in history."

He also paid tribute to Lady Bessborough and said "the crowning achievement of the Bessboroughs was the production of a young Canadian." (A son was born to Their Excellencies at Montreal in 1931).

J. H. Thomas, dominions secretary, likewise commended the earl for his remarkable public service and devotion.

Referring to the ovation paid Mr. Ferguson, he said: "We are not unmindful of the changes which must necessarily occur, but I would be wanting in my duty if I did not say publicly how every Canadian and every Britisher is proud of the great service rendered by the high commissioner to his country."

(Mr. Ferguson is expected shortly to place his resignation in the hands of the Canadian government, following the defeat of the Conservative party in the general election.)

CALL A NAVAL CONFERENCE TO MEET DECEMBER 2

London.—Great Britain formally invited the United States, Japan, France and Italy to a naval conference at London.

The government set the date for December 2, and followed up the invitations with an announcement in common by Sir Bolton Eyre-Monell, first lord of the admiralty, that the purpose of the conference would be to obtain an agreement replacing treaties expiring in 1936.

These are the Washington and London naval limitation pacts.

In Paris, officials said France would accept the invitation. Naval minister Francois Pietri, it was expected would join the British in asking qualitative instead of global (tonnage) restriction of fleets, which Japan has sought.

In Washington the state department announced the United States had accepted the invitation also.

In Tokyo, vernacular newspapers quoted anonymous naval officials as saying the attitude of the United States on parity promises little hope of success for the conference, although a foreign office spokesman said the government hoped for tangible results.

The government expected immediate acceptance of the invitations and designation of the various ambassadors here as chief delegates, assisted by technical experts, to lay the groundwork for the convocation.

Italy Withdraws Troops

Gesture Of Good Will Is Made Towards Britain

Rome.—Italy made a definite gesture of good will toward Great Britain by ordering the withdrawal of one division of soldiers from Libya but at the same time a spokesman asserted settlement of the Ethiopian war would be difficult "as long as the sanction machine works at Geneva."

Discussing the removal of the troops, which have been concentrated upon the border of Egypt, a spokesman said: "Our actions have been taken on our own initiative. Italy hopes the move will be interpreted as a friendly gesture."

The steamer Sannio, capable of carrying 2,000 troops, sailed from Naples for Libya under orders to be ready to take off contingents of the Metaxu division.

A government spokesman said Mussolini's gesture in Libya represents "a major contribution" to the solution of the problem of peace, not only in Europe but also in East Africa.

The matter, of course, does not dispose of the Italo-Ethiopian dispute. But in informed quarters belief was expressed that it lays a foundation for a solution, impossible so long as sanctions existed between Italy and Britain.

Mussolini started a drive against sanctions in his campaign to legalize Italy's Ethiopian conquests.

War forces on two fronts gave him accomplished results, which he will confront the League of Nations. Big and rich Tigre province of Ethiopia, taken by General Emilio de Bono and his troops, has been formally annexed.

To Run For Parliament

Ramsay MacDonald Will Be Candidate For Re-Election

London.—J. Ramsay MacDonald, lord president of the council, will again run for parliament in Seaham, it was announced. This ended rumors the former prime minister would soon accept a peerage, or would run in another seat. Seaham is regarded as a Labor stronghold, but Mr. MacDonald retained it by a majority of almost 6,000 in 1931, shortly after he had formed a national government and suffered expulsion from the Labor party.

Burglars Caught

Winnipeg.—A South Winnipeg confectionery proved a jinx to burglars. At two a.m., two men who had forced a door were found in the store and arrested. The door was repaired. At four a.m., police caught two more burglars busily packing up stolen goods.

Cancer Expert Dies

Baltimore.—Joseph C. Bloodgood, famous cancer expert of Johns Hopkins hospital, died suddenly at his home here. Death was due to coronary thrombosis.

Strides Made By Medical Science

Dr. Mayo Predicts Cure For Insanity Will Be Developed

Strides made by medical science in treating thyroid deficiency and performing goitre operations were explained to the assembly of the Interstate Postgraduate Medical Association of North America by Dr. Charles H. Mayo, of Rochester, Minn., retiring president of the organization.

Dr. Mayo drew a comparison of the old method of treating goitre merely by the external application of iodine to present highly-developed surgical methods. He declared, thyroid operations are made with a minimum of danger because of the discovery of treatment of the gland to remedy the deficiency and build up the patient.

Dr. Mayo predicted within five years a cure for insanity would be developed. He told the physicians he expected to see insane patients restored by an injection which would act on the brain in a manner similar to the action of the cure for thyroid deficiency.

"Thus far," said Dr. Mayo, "we have not come a very long way from the medieval treatment of the insane, but the future, I am sure, holds promise of another kind."

"I am sure that now have a drug which will change the blood circulation of the brain and will prove especially effective in the case of young persons suffering from dementia praecox."

"I have myself seen patients who had been confined to a hospital for periods of more than seven years, after injection with this substance. Almost instantly, their eyes became bright, their mental faculties returned; they became aware of their surroundings; they left the hospital."

"But within three weeks," Dr. Mayo said, "the effects of the drug had disappeared and they were back again at the institution."

The Rochester physician said he believed the cure eventually would be made permanent. He refused to name the drug, explaining the experimentation still is in progress, and that it has not yet reached a point where a definite report can be made.

Sanitary Crusade

Mahatma Gandhi Overcomes Prejudice In India

In his sanitary crusade which Mahatma Gandhi abandoned politics to organize, he is meeting with encouraging success. He has turned his workers into an army of scavengers and so dealt a deadly blow to caste and pride. Men and women who would not have allowed scavengers to pass within 30 yards of them are actually going about with brooms, brushes, buckets and disinfectants. The villagers are anxious to find persons of education and refinement from comfortable homes sweeping roads, collecting the rubbish and doing all sorts of mental work in the movement to lift up the Indian countryside.

Stamps Of Abyssinia

Various Animals Used To Identify The Denominations

Abyssinia first issued stamps, 1894, the design being a portrait of Emperor Menelik II, and the Lion of Judah. King Solomon's throne was depicted on the next series of stamps, together with a portrait of Menelik in a native costume.

There followed what is called the wild animals set. On the lowest value was shown an antelope, a giraffe was the design of the second value; rhinoceros, elephant, ostriches, water buffalo, and lions were depicted on other values.

On the issue now in use are depicted portraits of the various rulers of Ethiopia, and the statue of Menelik II, mounted on a rearing horse.

Use Tail Lights

Persons walking at night on the highway through the hills between Adelaide, Australia, and Gowwa, some distance from the city, are being supplied with red tail-lights which they hold behind them as a signal to approaching cars. Casualties have been reduced to a minimum.

Created Wheat Grass Seed

The past season has been favorable for grass seed crops in the prairie provinces. It is expected that 100,000 pounds of created wheat grass seed will be available in Alberta which will go a long way towards supplying seed for farmers and ranchers who are renewing their pastures.

MacDougall—Did you say anything to cheer up Sandy McPherson after his operation?

MacTavish—Yes. I told him he might not live to pay for it.

BRITISH STEAMERS HAVE HARD TIME DURING HURRICANE

Plowing her way through mountainous seas the "Cote d'Argent", above, Channel steamer plying between Calais and Dover, is shown as she passed the entrance to Dover Harbour, but unable to get inside because of the terrific wind and storm. She travelled almost to Folkestone before she could turn and safely come back to Dover. This gale was one of the worst experienced in years and several ships foundered in the Channel.

Rhubarb For Winter

How To Grow Pie Plant During The Winter Season

Fresh, crisp, pink rhubarb can be had during the winter months if the plans are made now to provide roots for forcing. The root system of this plant is a storehouse in which the necessary food has been stored and when given the required check and rest period, will produce an abundance of leaf stalks.

First arrange for crowns that have been in a plantation for at least two years or until they are well developed. Crowns that are over four years in a plantation do not force as well as those of the younger plants. In late October or early November, just before the ground freezes up, the roots should be dug, allowing a good ball of earth to adhere. Leave these on the surface of the ground without protection until they become frozen through. Sub-zero freezing, however, is not recommended. Four or six crowns of fair size will, as a rule, produce enough rhubarb for a family of three or four.

The crowns or roots being given the required period of dormancy are then brought into a dark cellar, where the temperature can be maintained at 50 degrees F., placed on the cellar floor and covered with soil, sand or cinders. The soil, sand or cinders hold the moisture around the roots. Another very good way is to place one large crown in a bushel hamper or box, packing soil around it to hold the moisture. Where several roots or crowns are to be used they can each be placed in a hamper or box. This method is very convenient for handling, where small numbers of roots are to be forced. In commercial forcing, the roots are placed as closely together as possible, on the forcing house floor or under greenhouses benches, and soil, sand or cinders placed around them. Water is applied when required.

To give continuity of harvest the roots or crowns should be brought into the forcing cellar at intervals of two weeks apart. It usually requires around three weeks to a month for the crop to be ready for pulling. If the roots are to be used for planting out again in the following spring, it is unwise to remove more than five pullings. After the fifth pulling the crowns should be put outside and allowed to freeze up again.

For forcing purposes it is unwise to use poor quality varieties, although some growers use seedlings. To obtain an even and uniform product, Ruby, MacDonald or Victoria will be found quite satisfactory, but where large stalked rhubarb is desired the Sutton variety will be found very useful.

Deadly Jazz

Elephant In South Africa Succumbs To Syncopated Noise

Jazz may be adopted as the best method to slay elephants in South Africa following the execution of a rogue elephant by a farmer near Nairobi recently. The man was surprised to discover at milking time, a large bull elephant grazing with his herd of pedigree cows. He organized a gang of boys with milk pails, gasoline can any anything else that would make a noise and with this impromptu jazz band went after the intruder. The elephant fled precipitately. The following morning the huge beast was found dead at the boundary of the farm. Anti-jazz campaigners declare the syncopated noise caused its death.

Horses may be banned from London streets.

Shoe Industry Busy

Production Of Leather Footwear In Canada Is High

In these days when much is being said about lost trade and unemployment it is interesting to learn from figures supplied by the trade itself that the production of leather footwear in Canada in the first half of the present year is the largest for any similar period in the history of the Canadian industry. The closest approach to the current figure was made in 1928, which was the year of peak production of boots and shoes in the Dominion. The Canadian leather footwear industry supplies most of the home market, but there are moderate imports, mainly from the United States and the United Kingdom. The Canadian industry also exports boots and shoes in limited quantity, the largest market being Great Britain. In the twelvemonth ended with June, both imports and exports of boots and shoes showed increase in value.—St. Thomas Times-Journal.

Punishment Is Severe

In the United States to-day a house or other structure is willingly set on fire—for insurance, excitement or revenge—on an average of once every 105 minutes, despite the fact that arson fires are usually easy to detect and the punishment is severe. In six states conviction calls for the death penalty and, in 14 others, it results in either life imprisonment or a 20-year sentence.

The ancient Circus Maximus in Rome, Italy, may be restored and again become the greatest stadium in Europe, with seats for 300,000.

Man Sacrifices Sight

Medical Science Gains Valuable Information On Eye Disease

A white man's sacrifice may aid the eyesight of Indians.

The white man was Clarence Brown, 50-year-old Iowan from Iowa City, who risked and lost the sight of his one good eye that medical science might gain valuable new information of trachoma, a dangerous disease. Brown, pronounced by physicians incurably ill from a malignant disease, entered the U.S. Indian hospital at Fort Apache, Ariz., last spring and permitted physicians to implant the virus of trachoma in his remaining eye.

The American journal of ophthalmology reports the experiments. Six weeks after the virus was implanted in Brown's eye he became totally blind, proving, the report said, trachoma is a communicable disease. The experiment proved also the virus is so small it can pass through a filter which would halt ordinary germs.

Still Carries Passengers

The packet schooner Grelco, said to be the only sailing vessel on the Atlantic still carrying passengers, cleared from New Bedford, Mass., recently for the Cape Verde Islands—3,000 miles and at least a month away. On board were 25 persons and a small cow. The cow will be a passenger only long enough to fatten a bit for the meals she will provide later on the voyage.

A New York dry cleaner claims to be able to treat rugs so they look like antiques. We had a landress who could do that with a shirt.

ACTUAL WAR PHOTOS FROM THE FRONT

As one of the few Ethiopian planes scouted the heavens for enemy planes, this Ethiopian military unit marched for the battlefield under cover of dusk, weapons and munitions borne by pack mules. Below is a photo taken on the southern front showing an anti-aircraft gun crew scanning the skies to the Italian Somaliland frontier for enemy machines.

Growing Egyptian Wheat

Using Seed Supposed To Have Come From An Eastern Tomb

A little farm hidden unobtrusively away south of Carmangay, Alberta, is attracting attention from farmers because of an unusual and unique experiment which is slowly reaching success. This experiment is the growing of Egyptian wheat. For 12 years experiments have been made with the seed, supposed to have been grown from wheat taken from the tomb of an Egyptian king. It is a bearded wheat that grows rankly, its main interest being in its feed qualities.

William Peacock, a farmer there, made the first tests and at last received some recognition for his work before his death. Planting the wheat at first in a small garden plot, he harvested it by hand. For three years he carried on this process until he had collected enough seed to start extensive sowing. Finally his labors bore fruit, and he sold some of his seed at \$1.50 a bushel and used the remainder for fattening hogs.

Peacock died, however, before his dream of having the wheat recognized as of real value came true. But the executors of the estate are continuing his work, Egyptian wheat being sown every year. Grain buyers have noticed that the quality of the wheat is steadily improving. The kernels are becoming harder, and each yield became heavier.

Last year a carload was harvested and forwarded to the elevator. It graded No. 2 C.W. White Spring and sold to millers for mixing purposes.

Westerners Good Sailors

Youths Are As Efficient As Those From Either Coast

"It is unusual that prairie youths should be interested in the sea and they make very fine sailors—just as good as any who have lived their lives in coast cities."

This was the comment of Commander Harold E. Grant, Ottawa, in charge of naval reserves, when in Regina to inspect the Regina hall company of the R.C.N.V.R. under Commander A. C. Ellison.

The naval reserve was the counterpart of a non-permanent militia, insofar as the navy was concerned, Commander Grant said. The object was to train men who are keen on the sea in the discipline, the routine and the various branches of naval work.

Many now in the R.C.N.V.R. had come up from the Sea Scouts and in his experience, he found that the men in the reserve from inland cities made every bit as good sailors as those who had lived in seaport towns all their lives.

Bound Man Uses Phone

Knocked Down And Tied Up, Uses Tongue To Dial

Dial phone operation with the tongue is the rare occurrence reported from Cleveland when the president of a brewing company had a difficult time notifying police he had been held up. He was bound hand and foot by two men who took \$500 from his office safe, wriggled to a telephone, knocked the receiver off the hook and began to dial "0" with his tongue. First he dialed "0" to get operator. "Call police there's a hold-up here," said Centanni. "Call the police department," the operator replied. "I can't," said the president. "I'm tied up." The operator then agreed to get police on the wire but she put the police on another line which Centanni could not reach. So he started to dial again with his tongue. That time he got "long distance." He was able to make the long distance operator understand his plight, and proper connections to the police department were completed.

Ex-Soldiers Turn Gardeners

Toil Underground To Supply English Markets With Delicacy

More than 1,000 pounds of mushrooms have been sent to market every day in the last 12 months by 37 ex-soldiers who grow the fungus underground in an abandoned stone quarry at Bradford-on-Avon, England. Every one of the farm's 48 acres is 90 feet below the ground, with meadows and grazing cattle overhead. On every side of a network of tunnels mushrooms grow in beds set in rows having a total length of miles. Electric fans help to circulate the air. Although it is completely dark in the caves, a full moon causes the mushrooms to spring up much faster, the growers declare. The ex-soldiers' farms occupy all the caves in the district and the men are searching for more.

Construction of London's television station has been started.

New Teaching Methods

Little Tote Are Learning To Use The Typewriter

Reading, "titt" and "rhythmic," those "three I's" sentimentally associated in the minds of older generations with school days, are now undergoing an alphabetical change. At least this is true out in the Berkeley school system, where typewriting has now become established in the curriculum for pupils from the second through the sixth grades.

It is maintained that use of the typewriter develops self-confidence in the little tots. It is a good medium for teaching punctuation and composition. It spurs an interest in spelling and reading. The little folks are allowed to operate the machines by the "hunt and peck" method, older ones are taught the touch system.

The typewriter, like the automobile, has come to stay. Obviously the child might as well learn its use at an early age, gaining the mastery of one more tool.

But will its advent in the schools also mark the end of those hours painstakingly devoted to practice writing, to pages of ovals and oblique penmanship, to the achievement of a clear, legible "hand"? The Spencerian penmanship which embellished autograph books of a half-century ago with birds and flowers and scrolls is fast disappearing, going the way of the redoubtable slaty writing teacher used to rule for newcomers of a crisp fall morning beside the school-room stove, a task which even to-day can send a shudder along the spine as memory recalls that screech of metal on slate, not quite like any other sound in the world.—Detroit Free Press.

High Blood Pressure

Now Said To Be Yielding To Surgical Operations

High blood pressure, one of the maladies attributed to the increased tempo of modern life, apparently is yielding to the surgeon's scalpel.

Speaking before one of the closing sessions of the annual meeting of the Interstate Postgraduate Medical Association, Dr. George Crile said that denervation operations performed on 82 of his patients for the relief of malignant hypertension, or high blood pressure, had obtained remarkably favorable results.

The noted Cleveland surgeon pointed out, however, his work in this field had not been carried on long enough to enable him to say that the cases effected surgically were permanent. "Dr. Crile said the fundamental substance which causes malignant hypertension is manufactured in the sympathetic nerve system leading to the thyroid of adrenal glands rather than in the glands themselves."

His technique in treating such cases surgically consists in clipping some of the sympathetic nerves supplying the glands and thus preventing them from sending the activating substance into the blood stream.

Unexpected Journey

London Woman Travels To Glasgow On Fast Express

A London woman is believed to have made the most economical long-distance railway trip ever recorded. She set out on a journey of 803 miles, from London to Glasgow and back, at a cost of one penny. But it was against her will. At Euston station the woman bought a penny platform ticket in order to see a friend off on the Royal Scot express. She sat in the train with her friend waiting for the departure whistle. Apparently so engrossed in conversation was she that she did not know the train was starting until she suddenly realized that it was moving out of the station. Officials on the platform saw her run to the window, and then looked despairingly as the train gathered speed out of the station. But it was too late. The Royal Scot does not stop between London and Glasgow, 401 1/2 miles apart.

"Have you a good biography?" said the minister at the bookstore. "Yes, indeed, sir," replied the clerk. "Have you read 'The Wealthy Preacher'?" "Perhaps you misunderstood me," insisted the minister. "I never read fiction."

Since 1929 the death rate for country babies has been higher than the death rate for city babies in the United States.

"Our great-grandparents would be amazed to see a car start simply by pressing a button," said a man who would lots of motorists.

Radio waves have approximately the same speed as light—186,271 miles a second.

 "One Wide River To Cross"
 "The Unknown Tori", Etc.

SYNOPSIS

Nancy Nelson is a sub-teen, a gay, irresponsible girl of nineteen, with no care beyond the choice of her costume for her coming-out party. Suddenly, in the market crash, her indulgent father loses all he had, and his family is faced with the necessity of a simpler method of living. At this juncture a letter is received from an eccentric relative in Colorado, who offers the girl a home on what seems to be impossible conditions.

After much consideration Cousin Columbine's offer is accepted, and Nancy and Jack arrive at Pine Ridge. Nancy sets out one afternoon to climb to the top of a hill so as to obtain a view of the surrounding landscape and misses the path Aurora Tubbs had told her to follow. A truck comes along the road, driven by Matthew Adams, and she asks him the way to go. They ascend the hill, look around, and then go on to Cousin Columbine's. There Mark Adam tells Nancy that his brother Luke has broken his leg, and that Jack Nelson has been hired to help out while Luke's leg gets better. With Jack away, Nancy finds that she is homesick, and having no books to read, the idea of starting a public library at Pine Ridge seems a good one, and Nancy writes home to get her parents to send all the books they could spare and all they could induce others to let them have.

Nancy's parents and friends gave their liberal support to her request for books, and a sizeable box arrived in due course. Father Adam painted a sign for the library, and the Adam boys worked on the shelves for the books and decorations to make the room look presentable.

Jack Nelson, Matthew Adams, and Nancy go to the prairie home of Matthews' uncle for the ride, and after Nancy and Jack leave for home, they are caught in a blizzard. Blinded by the swirling snow they collide with a bus full of school children, which was stalled across the road by its back wheels resting in a snow-filled gully. Their car being wrecked, Jack and Nancy stay with the children and do all they can to help. The next morning Jack sets out for camp in the blizzard. He succeeds in finding help, and the party of children and Nancy are rescued. As a result of the exposure Nancy's feet are badly frozen and Jack is seriously ill with pneumonia, but both of them recover.

Now Go With The Story

CHAPTER XXI.—Continued

He blushed a little; and Nancy said: "I'll admit that it is. It took pluck to leave even the cold shelter of that bus, you know. But to make a fuss over me is—!—!—! ridiculous! I'd have been a coward to watch those kiddies freeze to death and not do everything I could. You know I would!"

There was silence a moment before Matt asked: "Do you remember the last time we sat under the old pine, Nancy? You told me then that your courage had never been tested and you wondered how you'd show up in a pinch. Well, you know now, don't you?"

4 to 5
TIMES
MORE QUICKLY
DIGESTED THAN
COD LIVER OIL

Science has discovered why Scott's Emulsion of Cod Liver Oil is so much more beneficial than plain Cod Liver Oil. All plain oils are hard to digest; they must be emulsified in the stomach. We emulsify the oil in our Laboratories hence it is ready for almost immediate digestion and assimilation.

SCOTT'S EMULSION
 THE DIGESTIBLE COD LIVER OIL WITH THE PLUS VALUES

"I'd forgotten that," she answered softly; then lowered her voice still more, her face flushing a little. "Matt, will you tell me something, honestly? I can't ask Cousin Columbine, she looks so worn and tired; and I've got to know. It's about my feet. These papers said I'd lose them—that my legs were frozen solid to the knees."

"Yes, that was true, Nancy. I'm never going to forget the way I felt when the nurse told me an amputation wasn't necessary. I wanted to cheer, or—cry or something. Miss Columbine did cry when I told her."

Nancy swallowed, and it struck the young man that she was still frightened.

"Is there something else you want to know, Nancy?"

"Only—only—well, Mark carried me upstairs when I came home, Matt. Are my feet really all right, or—?"

So she'd been lying there acting cheerful and worrying about that thought. Matthew. Oh, she was wonderful!

"Of course they're all right!" he reassured her. "You could walk on them now, only the doctor said you weren't to go too fast. That's straight, Nancy. I wouldn't deceive you a time like this."

The girl sank back limply against her pillow.

"I suppose I'm a moron; but I've wanted to ask that question for days, and was too scared!" She smiled now, at her own foolishness, and added: "If all those complimentary newspaper reporters I knew I was terrified at the thought of ending my days in a wheel-chair, I guess they'd be frightfully disillusioned!"

"Disillusioned?" Matt's eyes flashed with protective indignation. "Disillusioned! Why—?"

"Are you plannin' to stay to dinner, Matt?" Adam called Aurora shrilly. "If so, and you're willing to carry up three trays, you and Miss Columbine can eat with Nancy. What say?"

CHAPTER XXII

"I am well aware, dear Cousin James," wrote Columbine Nelson on the first day of May, "how anxious you are to get your heroic young folks back; but nevertheless, I am going to ask a favor: Let them stay until Jack has time to sit out again. He looked so splendid the morning they started off for Prairie Ranch that I can't bear to send him home to you as gaunt as he is now. A few weeks of careful feeding will work wonders in his appearance; and Aurora Tubbs is itching to 'fat him up,' as she expresses it. If I may keep them until after the fourth of July they'll have a chance to see so much more of this wonderful country; and your old cousin will be far happier."

A note from Nancy added her plea. "Don't ever think that we're not crazy to see you all, but Jack is a beanpole, and Aurora's marvelous cooking ought to fix that in no time. Then too, Uncle Tom and Aunt Emma wait us at Prairie Ranch for a few days, just to convince us. I imagine that the plains can be warm and friendly as well as cold and cruel. A visit there will be something to remember; and anyway, Jack refuses to go home until he's husky enough to handle a pick and shovel and can straighten up the gate posts at Cousin Columbine's driveway. They trouble him a great deal more than they do her (!); but she does want the house painted, and couldn't afford to because she paid our fares out here. Aurora told me that. I guess Uncle Jethro didn't make any great pile in Leadville; and I shan't accept a penny of the 'salary' she offered as bait in that comical letter. Your wandering girl will return as poor as she started out!"

"But I'm feeling wonderful now. My feet are as good as new. The library's booming; and I still get something of a kick when any one addresses me as 'Miss Aladdin.' I've just got back on New England. Daddy; but I'll miss the library and those 'big open spaces' we Easterners joke about. Tell Phil I'm sending him some real Indian arrow heads."

"Great! I'd hate to be responsible for such a place, Nancy; yet when you come I'd rather live in this wild tangle than in a city cemetery with a neatly mowed lawn above me, and a 'perpetual care' sign over my head."

Though the family at Edgemere was disappointed, this plan was obviously best for Jack, and they did not protest. The boy's strength returned more rapidly than Cousin Columbine anticipated; and by the middle of May they ventured to make some of the long-promised excursions to places not far distant enough to tire him.

"I'm sick to death of putting up picnic lunches," grumbled Aurora one bright May morning. "And why anybody in their senses should go to Cripple Creek when they could stay away, is something entirely beyond me. Not a tree in the whole town, Nancy Nelson! Not a growin' thing less than you count; and those awful prospect holes all over the hills lookin' for all the world like open graves in a cemetery. And here's Miss Columbine as excited over the trip as if she'd never seen a mine! Town, let alone lived in one of the peaky places for months on end! Jack, you're to drink every drop of milk in this thermos bottle; and if you feel able to digest 'em eat three bananas. They're powerful fattening; as I ought to know if anybody does. Is it true Eve-Adam's takin' a whole roast chicken? I hope for your sakes her husband had the cookin' of it. Looks like Adam's in perfect health; every thing these days to take you gals in."

"It's a wonder they stop to milk the cows."

Eve Adam laughed when Nancy repeated this caustic comment.

"But who cares, my dear? We'll make up the neglected work after you leave us; and it warms my heart to see how Miss Columbine enjoys these trips. It gives her a new lease of life to visit the old scenes and talk of those times with young folks who are really interested."

Jack thrilled over that trip to Cripple Creek; but the day they visited the scene of Marsh Pemperton's colossal hoax, stood out, a high light, in Nancy's memory. This was during the first week in June, a day with soft, white clouds drifting across the sky, and air like mid-summer. Their road led past ranches where men were ploughing immense acres; then on through mile after mile of yellow pines. Seated between Mark and Aurora in the old truck (the comfort of the new sedan being given over to the older Adams, Cousin Columbine, and Jack), Nancy caught her breath at occasional glimpses of distant mountains, some snow-rimmed.

"I'm all speechless over this scenery," she confessed, while the boys smiled in amusement at her enthusiasm, "yet those two idiots" (with a backward glance toward Luke and Mary Taylor, seated on cushions in the rear), "are jabbering away as if they were no 'wonders' to behold. What else is this?"

"Love's young dream, lady," Mark opined as he slowed down for a thank-you-ma'am. "Luke's always been more or less what Aurora calls 'a dreamer'; and that girl has certainly blossomed out just lately, the result, I believe, of association with Miss Aladdin."

Nancy laughed; and Matt said solemnly: "With all due respect to Miss Aladdin, I've a notion that our kid brother is responsible for this change in Mary Taylor." He turned to view the unsuspicious couple seated below, and added: "At any rate, they're both oblivious to the scenery!"

Mark chuckled, and rounding a curve, announced: "Here's your pioneer cemetery, Nancy—the one Miss Columbine told about. Shall we view it from here, or are you determined to climb that slope in this hot sun?"

"What did we come for?" the girl responded; and as Matt sprang down she took his steady hand and followed. "I wouldn't miss seeing this place for anything. Aren't they all coming?"

Mark shook his head. "I'm starving. I'm going to forage in the lunch box. What do you say, folks?"

This last was addressed to Luke and Mary, to whom the lunch box seemed more alluring than the cemetery. So it was that Matt alone that afternoon explored that tragic spot, looking down soberly on graves protected only by sagging fences, the marking on their wooden headboards almost obliterated—some wholly lost amid an overgrowth of weeds and bushes.

Perhaps it was the history of the place that silenced the young people. Neither spoke for a time; and then Nancy stooped, laying a spray of blossoming pink kinnikinnick on one small unmarked resting place.

"Somebody's baby," she explained, flushing a bit for fear that Matt would think her sentimental; but to her relief he added:

"And all because of one man's greed. I'd hate to be responsible for such a place, Nancy; yet when you come I'd rather live in this wild tangle than in a city cemetery with a neatly mowed lawn above me, and a 'perpetual care' sign over my head."

Don't Guess But Know

Whether the "Pain" Remedy You Use is SAFE?

Don't Entrust Your Own or Your Family's Well-Being to Unknown Preparations

THE person to ask whether the preparation you or your family are taking for the relief of headaches is SAFE to use regularly is your family doctor. Ask him particularly about "ASPIRIN."

He will tell you that before the discovery of "Aspirin" most "pain" remedies were advised against by physicians as bad for the stomach and, often, for the heart. Which food for thought if you seek quick, safe relief.

Scientists rate "Aspirin" among the safest methods yet discovered for the relief of headaches and the pains of rheumatism, neuritis and neuralgia. And the experience of millions of users has proved it safe for the average person to use regularly. In your own interest remember this.

"Aspirin" Tablets are made in Canada. "Aspirin" is the registered trademark of the Bayer Company, Limited. Look for the name Bayer in the form of a cross on every tablet.

Demand and Get "ASPIRIN"

His voice was thoughtful, and with sudden inspiration the girl quoted:

"Under the wide and starry sky
 Dig my grave and let me lie."

"Is that how you feel, Matt?"

His eyes lighted at her intuition; but before he could reply, Mark's laughing voice broke in upon them.

"Both poetic and appropriate, young lady; but you two seem to have forgotten that we're on our way. The old folks have caught up with us, but they're too lazy to get out, and Jack's already explored this melancholy scene. There's still ten or twelve miles ahead if we're to eat our lunch on the shore of the Plateau, as Miss Columbine has set her heart on doing. Have some cake?"

Matthew, who longed to strangle his brother for this intrusion, nevertheless accepted his portion with good grace; while Nancy exclaimed: "You've saved my life, Mark! I'm almost passing out. Isn't the Plateau river we read about in history—I mean the one the pioneers were always fording?"

 selected by experts as the daily cereal for the Dionne Quintettes

Rise In Diamond Prices

Increase To Release More Stones For The World Market

London's diamond kings, controllers of the world's supply, are to release for sale more uncut stones within a short time than were sold throughout the whole of the last year.

So convinced are they in England that the world has recovered enough to indulge once more in luxuries that prices are being advanced 7½ per cent, and there is confidence that all stones offered will be sold.

Altogether stones worth more than \$15,000,000 will be offered to selected buyers from all parts of the world within two months. The Diamond Corporation, which has accumulated \$45,000,000 worth of stones during the years of depression, has been allocated a quota in the sales. Invitations already have been dispatched to representative brokers in Amsterdam, Antwerp, Vienna, Paris, Bombay and New York.

The central selling agency of the diamond groups is in a four-story building off "Rue de la Loi." Every foreign buyer is shown into a walnut-paneled room. He is accompanied by a representative of the sellers. On a square of plain white paper on a ledge under the window is poured a little heap of graded, uncut stones. It represents a fortune.

The buyer examines the stones, makes his choice, pays his price, and departs with a tiny package as casually as if he had purchased a bag of nuts.

Biggest buyers are expected to be New York and India. U.S. jewellers' stocks are believed to be lowest since the depression. India's demand is based on "dehoarding" of gold by the princes.

Little Helps For This Week

Love is of God, and every one that loveth is born of God and knoweth God. I. John 4:7.

Forbearing one another and forgiving one another. Colossians 3:13.

Oh, might we all our lineage prove,
 Give and forgive, do good and love.
 By soft endearments, in kind strife,
 Lightening the daily load of life.

We may if we choose make the worst of one another. Every one has his faults, every one his weak points, and we may fix our attention constantly on these. But we may also make the best of one another. We may forgive even as we hope to be forgiven. We may put ourselves in the place of others and ask ourselves what we would wish to be done to us were we in their place. By loving whatever is lovable in those around us, love will flow back from them to us and life will be a pleasure indeed instead of a struggle. Earth will become like heaven and we shall not be unworthy followers of Him whose name is Love.

Birds Devour Hoppers

Thousands Of Gulls Land And Clear The Fields

In certain parts of southern Alberta where grasshoppers were so numerous this summer vast flocks of gulls were literally covering the fields, rounding up the hoppers, and when they had concluded their attack about 75 per cent. of the insects had been devoured.

Reeve A. Schug of Rosenheim said that on a field of 60 acres a flock of gulls glided in from the south and practically covered the ground. He estimated about 50,000 on the entire field. A wave of grasshoppers could be seen travelling ahead of the birds trying to evade them as the gulls walked onward, but by the time the gulls had done to their satisfaction some three-quarters of the hoppers were no more.

Used Live Exhibit

The only thing Johnny Crossland, in grade 7, could talk about was horses when members of his class in a Winnipeg school had to make speeches. And he couldn't give a proper address without a live exhibit. So into the classroom walked Johnny leading a white pony, with a saddle 'n' everything. He made a good speech, too.

Lions For Rome Zoo

The Rome zoological garden will be among the first to reap the fruits of Italy's war of conquest in Ethiopia. Two small lion cubs were found by Italian soldiers who captured Addwa and have been shipped to Rome.

Rhodesia will establish a mining school, with practical work in a gold mine.

Care Of Children

Lectures To Be Given In New York To Educate Mothers

An institute to debunk the ancient myth that all mothers are good mothers was founded in New York with plans to promote its ideas by lectures and clinics. The institute's program was outlined by Bernard Deutsch, president of the New York board of aldermen.

"Every walk in life, to be truly successful, needs long and weary training," he said. "Why expect motherhood? Let us debunk the ancient myth once and for all. There are good mothers, bad mothers, indifferent mothers, diligent mothers, intelligent mothers, and ignorant mothers."

By instructing women in proper care of children, the institute is to attempt improving the motherhood "ability" of its pupils.

Local News

Born at Cremona, to Mr. and
Mrs. J. R. Oneil on Sunday October
20th, a son.

Mr. and Mrs. Les. McKay, of
Drumheller, were renewing acquaintances
in town on Tuesday.

Miss Alice Collicutt is reported
to have won \$10.00 in one of the
recent sweepstakes.

Rev. G. W. Kerby of Calgary
was the guest of Wm. Laut and
Rev. and Mrs. E. Longmire on
Sunday.

Mrs. M. Patmore returned home
on Saturday, after spending the
past two weeks visiting her sister
Mrs. A. Hudson of Langdon.

Gudmund Johnson, the much
fired and hired bartender, is once
again, back serving up the amber
fluid at Adam's.

Mrs. W. Silven came over from
Edmonton on Friday evening to
visit her daughter Mrs. L. Raisback.

Mr. and Mrs. R. D. Sutherland
and Mr. and Mrs. Shaw of Carristair,
were visitors in the Cochrane Dis-
trict on Sunday.

Russell Bills has leased the farm
at present occupied by Orville Bills,
and owned by his father, D. Bills
of Van Nuys, California.

It looks as if winter is upon us
and the skating rink has never been
finished. Is the Council waiting for
Aberhart's dividends before spend-
ing the money they have on hand.

Mr. and Mrs. T. M. Mair and
Maxine, left on Thursday last on a
motor trip to Brandon. Mrs. Fitz-
patrick accompanied them as far as
Moose Jaw where she will visit
her sister.

Mr. and Mrs. F. Brown and fam-
ily of Claresholm, were the week-
end guests of Mr. and Mrs. A. E.
Edlund.

Mr. Brown and the boys returned
home on Monday while Mrs. Brown
will remain until Friday.

The Board of Trade wired to
Pete Knight on Tuesday of this
week, congratulating him on his
success. Madison Square Gar-
dens New York, where he won the
Rodeo and another Worlds Cham-
pion ship last week.

Mrs. Currie and Mrs. Cartwright
entertained the members of the
W. A. to a Halloween party on
Monday. After refreshments, which
were served at very tastefully de-
corated tables, the time was spent
in telling ghost stories and competi-
tions.

Walt Spivey is a member of a
syndicate holding a lucky ticket on
the Irish Sweepstakes. The report
is that they have drawn a horse,
which guarantees them \$1825.00
and if their horse is out in front it
means \$150,000.00 for the group.
Here is hoping he is away out in
front.

A land deal of considerable im-
portance was put through last week,
when Orville Bills bought a section
of land from the Trca Estate. This
is the North Section farmed for
some years by F. Trca. It was a cash
deal but the price was not divulged.

Calgary opened their new artificial
rink last week. This week the
New York Rangers play three ex-
hibition games at Calgary on Mon-
day, Thursday and Saturday nights.

With the fall of snow, Everett
Bills is again enjoying that great
sport of running coyotes with a
number of fleet footed hounds. He
has been successful in catching five
so far.

Alfred Stevens, Glen Williams
George Lem attended the hockey
game in the new artificial rink at
Calgary on Tuesday night. The
New York Rangers played an exhibi-
tion game against a pick-up team of
comers and has been. The score
being 3 to 1 for the Rangers who
displayed some nice combination.

During the past two years Halle-
we'n has been observed in a more
quiet manner in town than in pre-
vious years, and it is to be hoped
that the same safe and sane attitude
will be taken this year. Destruction
of property is at any time against
the law and offenders are subject
to prosecution.

Rev. and Mrs. Young Missing

Drumheller, Oct. 30.—Missing
since Monday afternoon, when the
car in which they were driving was
seen in the vicinity of Morris, north
of here, Rev. H. Young and his
wife, of Trochu, Wednesday morn-
ing and afternoon were the objects
of widespread search by Royal Cana-
dian Mounted Police and private
citizens, who up until late Wednes-
day night reported no trace of the
missing couple.

STOP PRESS — Word came

through at 4 p.m. today, that Mr.
and Mrs. Young had been located
fourteen miles east of Beiseker.

LOCAL NEWS

Miss Irene Jack of Dog Pound,
was a visitor in Town last Friday.

The Legion Armistice Dance will
be held in U.F.A. Hall on the 11th
of Nov.

O. E. Coffin bought the second
prize Yorkshire Boar at the Calgary
Livestock Show and Sale.

Among those noticed driving
new cars this week are E. Bills, John
Lawson and John Hehr.

The many friends of J. M. Will-
iams will regret to know that he is
ill with an attack of asthma and a
severe cold. He has been removed
to the General Hospital, Calgary,
for treatment.

Owing to the inclement weather
on Sunday, many were kept away
from the thirtieth anniversary ser-
vices of the United Church. Rev. G.
W. Kerby conducted the service at
Rodney in the morning and
Crossfield in the evening.

Dr. Kerby's message, as usual,
was greatly appreciated by all who
braved the weather to attend.

The regular meeting of the Cana-
dian Legion was held in the club
room Saturday October 26th. The
next meeting will be nomination
for officers on the last Saturday in
November at 2.30 P. M.

Monday November 25th. will be
the 10th. birthday of the Legion
and it was decided to hold the usual
monthly social evening on that date.

Score at Calgary Fall Show

At the Calgary Fall Stock Show
October 23, 24, 25, the Collicutt
Herd-fords took a large share of the
prize money. George Leask of Mad-
den a Championship and several
other prizes with his bacon type
hogs.

Everett Bills bought two prize
rams at the Calgary Stock Sale. He
paid \$50.00 for the first prize win-
ner.

G. K. Allonby bought an out-
standing Shorthorn Bull of the
making strain.

Card of Thanks

The Members of the C. W. L.
wish to express their thanks and
appreciation to their many patrons
whose patronage and contributions
made their supper and concert a
real success. They also wish to thank
Mr. G. Y. McLean and his caste for
their assistance in making it a
real enjoyable evening.

Card of Thanks

We wish to thank most sincerely
all our friends for their many kind
expressions of sympathy and assis-
tance during our recent sad bereave-
ment.

Mrs. R. Nichol and Family.

Along Broadway.

Frank Ruddy is gumming things
up had these days. A. F. looking
for a peeping tom. A lady in the
North end of town, with a broom
handle in her hand and blood in
her eyes. G. Y. McLean meeting the
2 A. M. train. All three of us miss-
ing the nod on that bottle of scotch.
Corporal Cameron saying a guy
thirty days in the House Gov.
Harry wondering why his partly
unloaded car of coal should decide
to go to Red Deer during the night.
John Chalmers scaling Miller's high
board fence and making a perfect
four point landing. Doug. Hall
making the turn so fast that he
did not have time to deliver the
milk. Archie telling Massie and
Alonby that Bennett was respon-
sible for the low price of sheep. Ed
Meyers agreeing with the sugges-
tion that he move into town for the
winter.

Ray Gilchrist left on Tuesday
for New Daydon, where he will
in future reside.
